Machine Dreams Jayne Anne Phillips, 1985 Het leven van een Amerikaanse familie in de periode 1950-1970 waarin o.a. de oorlog in Vietnam van invloed was op de levens van direct en indirect betrokkenen [Machine Dreaming and Consciousness](#) J. F. Pagel, Philip Kirshtein, 2017-04-13 Machine Dreaming and Consciousness is the first book to discuss the questions raised by the advent of machine dreaming Artificial intelligence AI systems meeting criteria of primary and self reflexive consciousness are often utilized to extend the human interface creating waking experiences that resemble the human dream Surprisingly AI systems also easily meet all human based operational criteria for dreaming These dreams are far different from anthropomorphic dreaming including such processes as fuzzy logic liquid illogic and integration instability all processes that may be necessary in both biologic and artificial systems to extend creative capacity Today multi linear AI systems are being built to resemble the structural framework of the human central nervous system The creation of the biologic framework of dreaming emotions associative memories and visual imagery is well within our technical capacity AI dreams potentially portend the further development of consciousness in these systems This focus on AI dreaming raises even larger questions In many ways dreaming defines our humanity What is humanly special about the states of dreaming And what are we losing when we limit our focus to its technical and biologic structure and extend the capacity for dreaming into our artificial creations Machine Dreaming and Consciousness provides thorough discussion of these issues for neuroscientists and other researchers investigating consciousness and cognition Addresses the function and role of dream like processing in AI systems Describes the functions of dreaming in the creative process of both humans and machines Presents an alternative approach to the philosophy of machine consciousness Provides thorough discussion of machine dreaming and consciousness for neuroscientists and other researchers investigating consciousness and cognition **The Secret Country** Sarah Robertson, 2007 The Secret Country is the first monograph on the work of the contemporary American novelist Jayne Anne Phillips Through detailed and innovative textual analysis this study considers the southern aspects of Phillips writing Robertson demonstrates the importance of Phillips place within the southern literary canon by identifying the echoes of William Faulkner Katherine Anne Porter and Edgar Allan Poe that permeate her work Phillips complex attachments to a regional past are explored through both psychoanalytical and historical materialist approaches revealing not only the writer's distinctly southern preoccupations but also her reflections on contemporary American society Tracing the family dynamics in Phillips work from the turn of the twentieth century to the present this book examines the effects of increased modernization and capitalization on everyday interactions and questions the nature of the author's backward glance to the past This volume is of interest for a wide audience particularly students and scholars of contemporary southern and American literature

Mirowski,2002 This is the first cross over book into the history of science written by an historian of economics It shows how
history of technology can be integrated with the history of economic ideas The analysis combines Cold War history with the
history of postwar economics in America and later elsewhere revealing that the Pax Americana had much to do with abstruse
and formal doctrines such as linear programming and game theory It links the literature on cyborg to economics an element
missing in literature to date The treatment further calls into question the idea that economics has been immune to
postmodern currents arguing that neoclassical economics has participated in the deconstruction of the integral self Finally it
argues for an alliance of computational and institutional themes and challenges the widespread impression that there is
