Transputer Research and Applications, 2 John A. Board,1990 **Architectures, Languages and Techniques for Concurrent Systems** World Occam and Transputer User Group. Technical Meeting,1999 During the past fifteen years concurrency in programming languages such as Java rose and fell and again became popular At this moment developers advise us to avoid concurrency in programming They are using a host of deprecated methods in the latest releases How are we to understand the love hate relationship with what should be a widely used approach of tackling real world problems The aim of *Architectures Languages and Techniques* is to encourage the safe efficient and effective use of parallel computing It is generally agreed that concurrency is found in most real applications and that it should be natural to use concurrency in programming However there has grown up a myth that concurrency is hard and only for the hardened expert The papers collected in this book cover the whole spectrum of concurrency from theoretical underpinnings to applications The message passing style of concurrency developed in the Communicating Sequential Processes CSP approach is considered and extensions are proposed CSP's realization in the programming language occam is used directly for applications as diverse as modeling of concurrent systems and the description of concurrent hardware This latter application may be compared to the use of Java for the same purpose Concurrency and the use of Java is the subject of further papers as is the provision of CSP like facilities in Java and C and techniques to use these languages to construct reliable concurrent systems At a time when concurrency gives headaches this book brings a welcome breath of fresh air Concurrency can really be a positive way forward *Occam and the Transputers, Current Developments* World Occam and Transputer User Group. Technical Meeting,1991 Examines applications of transputers and OCCAM including numerical image processing neural networks natural language processing networks and biological systems as well as tools routing and mapping The T9000 new generation transputer introduction is further discussed **Transputer Applications** Mike R. Jane,Raymond J. Fawcett,Terry P. Mawby,1992 The symposium held in Reading in March 1992 celebrated the completion of a 5 year Initiative in the Engineering Applications of Transputers It reviewed achievements in a range of applications and supporting fields and predicted future developments This book represents a collection of articles presented at this meeting as well as independent reviews of the Transputer Initiative **UK Parallel '96** Chris R. Jesshope,A.Shasha Shafarenko,2012-12-06 Parallel processing is a key topic which is becoming more important as the technology becomes more widespread UK Parallel 96 Proceedings of the BCS PPSG Annual Group is the publication of the academic programme from the first in an annual series of national conferences covering the broad area of parallel and distributed computing It was coordinated by the BCS Parallel Processing Specialist Group and provided a focus for both research and industrial presentations This first conference was

held at the University of Surrey in July 1996 and contains work from a number of universities within the UK The scope of the proceedings illustrates the breadth of the work being undertaken in the UK and includes a variety of papers covering a number of important areas including compiler development for both data parallel and message passing languages and the development of application specific software
