**Language Learning Strategies in Independent Settings** Stella Hurd, Tim Lewis, 2008-10-03 Language learning strategies have been a topic of research for roughly three decades Broadly speaking that research has focused on classroom tuition predominantly at secondary level Increasingly however language learning occurs in independent settings whether at distance on Institution Wide Language Programmes IWLPs or in virtual environments Success in independent language learning is achieved by autonomous individuals with a capacity for self regulation Yet we still know relatively little about the specific means they use to learn effectively whether in terms of the affective strategies they employ to sustain motivation the metacognitive strategies required for planning monitoring and evaluating their learning or the specific cognitive strategies applied to difficult learning tasks These are all discussed and evaluated in *Language Learning Strategies in Independent Settings* [A Modern Guide to Adult Learning Systems](#) Richard Desjardins, Jan Kalenda, 2025-08-28 This book presents a comprehensive overview of Adult Learning Systems ALS in a range of post industrial market democracies situating them within historically and spatially comparative contexts It illustrates the diverse ways in which different systems have responded to the shared and specific challenges involving organized adult learning Renowned specialists map the evolution of ALS over the past three decades exploring how socio economic pressures historical legacies and policy interventions have shaped their current forms Chapters delve into a range of case studies across Asia and Europe highlighting unique context dependent institutional development paths The book sheds light on the elements that frame ALS and applies historical institutionalism to adult education advancing comparative research with new analytical approaches It examines trends and patterns and establishes a foundation for more extensive research on the development and transformation of ALS is a crucial resource for students and academics in sociology and education particularly researchers interested in a state of the art for organizing adult learning It also provides valuable insights for policymakers delivering a conceptual framework for the design and implementation of effective adult education policies

**The Routledge Handbook of Language Learning and Teaching Beyond the Classroom** Hayo Reinders, Chun Lai, Pia Sundqvist, 2022-05-30 Informal language learning beyond the classroom plays an important and growing role in language learning and teaching This Handbook brings together the existing body of research and unites the various disciplines that have explored this area in order to present the current state of knowledge in one accessible resource Much of adult learning takes place outside of formal education and for language learning it is likely that out of class experiences play an equally important role It is therefore surprising that the role of informal language learning has received little attention

over the years with the vast majority of research instead focusing on the classroom Researchers from a range of backgrounds however have started to realise the important contribution of informal language learning both in its own right and in its relationship with classroom learning Studies in the areas of learner autonomy learning strategies study abroad language support learners voices computer mediated communication mobile assisted language learning digital gaming and many others all add to our understanding of the complex and intersecting ways in which learners construct their own language learning experiences drawing from a wide range of resources including materials teachers self study technology other learners and native speakers This Handbook provides a sound and comprehensive basis for researchers and graduate students to build upon in their own research of language learning and teaching beyond the classroom
