Love and Work Reuben Fine, 1990 **Getting From Here to There** Sheldon Bach, 2013-05-13 It is clinical work with the most difficult patients those with severe narcissistic sadomasochistic and borderline disorders that poses the greatest challenge to the therapist's guiding assumptions about clinical process indeed such work often leads therapists to question beliefs and expectations that formerly seemed self evident In Getting From Here to There Analytic Love Analytic Process Sheldon Bach elaborates the holistic vision that guides him in work with just such patients He dwells especially on the attentive presence through which the analyst effects a meeting with patients that invites the latter's trust in the analyst and in the therapeutic process And he writes of love of patient for analyst and of analyst for patient that grows out of this mutual trust and sustains therapeutic process For Bach analytic therapy aims at understanding the person as a mind body unity that manifests particular states of consciousness This holistic vision of treatment sustains a flexible clinical orientation that enables the analyst to meet states of consciousness in order to bring them into a system of which the analyst forms a

part Bach thoughtfully explores the clinical issues that enter into this taxing process among them the establishment and maintenance of basic trust the patient's or the therapist's presence in the other's mind and the shifts in agency between patient and therapist And he describes at length the frequently exhausting even demoralizing transference countertransference struggles that enter into this type of analytic work Throughout Bach is guided by the conviction that work with extremely challenging patients promotes the psychological growth and increased self knowledge of patient and analyst alike And he is admirably clear that the mutual living through of such treatments nurtures a kind of love between patient and analyst Getting From Here to There not only records the clinical lessons learned by an unusually gifted analyst it also chronicles the movement of psychoanalysis itself from the dissection of love into component parts to a synthetic grasp of its vital role in psychoanalytically informed treatment

Love and Hate in the Analytic Setting Glen O. Gabbard,2000-04-01 Passionate feelings of love and hate are stirred in psychotherapy Paradoxically these passions may either undermine the therapist catastrophically or serve as the crucible in which profound understanding is forged Transferences and countertransferences of love and hate occur on a spectrum that includes unobjectionable negative and

positive feelings relatively benign forms of love and hate and more malignant intractable versions of love and hate that present formidable challenges to the therapist Each of these variations is explored in different chapters of this book Gender configurations gender fluidity adolescent transferences the link between love and lust and passive forms of hating are among the topics discussed Most of all the author noted psychoanalyst Glen Gabbard depicts what it is like to be in the eye of the hurricane when passions are aroused He provides a practical yet theoretically sophisticated guide to the management of love and hate as they are experienced by both patient and therapist

Love and Its Place in Nature Jonathan Lear,1998-01-01 Jonathan Lear has shown us both Freud's texts and his subject matter from a new angle of vision one that renders much recent controversy about psychoanalytic theory irrelevant For any student of those texts this book is indispensable Alasdair MacIntyre Lear makes one understand how psychoanalysis works not only on the therapist's couch but also as a condition of being alive Love and Its Place in Nature not only offers a form of spiritual nutriment for the self it also defines that self with a clear profundity that few readers will have encountered before Christopher Lehmann Haupt New York Times A brief and engaging philosophical perspective on Freudian psychoanalysis The book is simply written but important themes are profoundly investigated An important philosophic reading of Freud Don Browning Christian Century In this brilliant book Jonathan Lear argues that Freud posits love as a basic force in nature one that makes individuation the condition for psychological health and development possible Love is active not just in the development of the individual but also in individual analysis and indeed in the development of psychoanalysis itself says Lear Expanding on philosophical conceptions of love nature and mind Lear shows that love can cure because it is the force that makes us human

Psychoanalytic Perspectives on a Turbulent World Halina Brunning,Mario Perini,2018-05-08 This article is intended to contribute to our understanding of the December 2001 collapse of Enron The existing literature on Enron's demise falls largely into two broad areas involving either micro psychological explanations or macro accounts that emphasize the workplace and its environment this paper is an exploratory study that focuses on a new interpretation which links the two areas more closely together It is proposed that Enron's culture was influenced by both micro and macro factors an experience of unsuccessful paternal authority figures within the family history of Enron's leaders coupled with an experience of problematic government and regulatory regimes associated with the gas industry Drawing on concepts from psychoanalysis and its application to organizational dynamics it is argued that these micro and macro factors helped to generate an Oedipal mindset in Enron's leaders according to which external authority was seen to be weak and not worthy of respect and that this contributed to Enron's demise Implications for theory are examined
