Hood Jr., Hood, Jr. (Ralph W.), 2019 The study of the psychology of religion has emerged only recently as a distinct specialty within academic study Its emergence testifies to the continued interest in religion both from those who are committed to a faith perspective and those who oppose religion as a threat to progressive secular values In this Very Short Introduction Ralph Hood explores the relationship between psychology and different faith traditions He shows how for some psychology can be used as a means to explain religion as ultimately an infantile system of beliefs that both individuals and cultures are destined to overcome with maturity For others psychology and religion can be in dialogue with psychology providing its insights and explanations that help understand religion without claiming to explain away religious claims And finally there has been an emergence of explicit religious psychologies in which religion provides the ultimate frame within which psychology attains its limited validity Hood discusses the strength and limitations of these positions considering multidimensional aspects of religion including belief behavior and experiences Looking to the future he concludes with a discussion of the future of religion in secular societies ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
