

FEMALE PUBERTY

Puberty is a time of change and development — you are growing up! Puberty begins around 9–14 years of age. Changes happen in the body caused by chemicals called hormones. It's important to remember everyone is different and not to compare your journey to adulthood with others. However, there are common changes that happen during puberty.

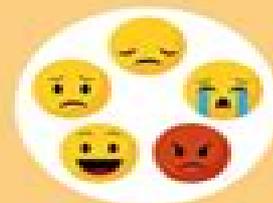

BODY SIZE

Arms, legs, feet, and hands grow at a faster rate than other body parts.

EMOTIONS

Fear, frustration, anger, sadness, mood swings and so much more are all feelings you may encounter during puberty. It is a great change physically and emotionally.

BREASTS

Breasts grow larger and develop. Sometimes one is larger than the other — that's natural and will balance out. They develop and a bra may be needed for support.

SWEATING

Body odour can develop, so you may need to shower more regularly.

BODY SHAPE

Breasts will continue to grow, hips will widen and the waist gets smaller.

SKIN

Skin sometimes becomes oily and spots and/or acne may appear.

HAIR

Hair will start to grow on the pubic regions, underarms and legs.

MENSTRUATION

Menstruations usually starts between the ages of 9–14. A layer of blood and tissue builds up in the uterus and is discharged monthly. The flow varies from person to person.
