Simulating War Philip Sabin,2012-01-19 Over the past fifty years many thousands of conflict simulations have been published that bring the dynamics of past and possible future wars to life In this book Philip Sabin explores the theory and practice of conflict simulation as a topic in its own right based on his thirty years of experience in designing wargames and using them in teaching *Simulating War* sets conflict simulation in its proper context alongside more familiar techniques such as game theory and operational analysis It explains in detail the analytical and modelling techniques involved and it teaches you how to design your own simulations of conflicts of your choice The book provides eight simple illustrative simulations of specific historical conflicts complete with rules maps and counters *Simulating War* is essential reading for all recreational or professional simulation gamers and for anyone who is interested in modelling war from teachers and students to military officers

Strategic Organizational Diagnosis and Design Richard M. Burton,Borge Obel,2012-12-06 We will not repeat our preface discussion from the first edition Here we only add some new comments a note to the reader and user changes in the book and the Organizational Consultant OrgCon and our thanks to the many individuals who have contributed critically to this venture read and reviewed the book contributed chapters and cases and similarly used and critiqued the OrgCon For the reader there are two very contrasting approaches to reading this book and learning about organizational design The more traditional approach is to read the book and then use the OrgCon on cases and applications The second approach is to begin with the OrgCon software and only examine the book as you find it helpful Which approach is better It is your choice not ours In our experience students in organizational design prefer to start with the OrgCon and a case rather than with the book itself Readers who have more background in organization theory and design usually examine the book first We have tried to write the book so that it can serve both as a reference and an integrated presentation

Stalin's Keys to Victory Walter S. Dunn,2007-10-17 An important reevaluation of World War II on the Eastern Front Detailed look at how the Soviet Union created more new divisions in a few months than the U S did during the entire war More than 60 tables list losses tank and weapon production and unit formation with special emphasis on rifle and tank divisions and brigades When Hitler invaded the Soviet Union in June 1941 the German Army quickly annihilated a major portion of the Red Army Yet the Red Army rebounded to successfully defend Moscow in late 1941 defeat the Germans at Stalingrad in 1942 and Kursk in 1943 and deliver the deathblow in Belarus in 1944 Dunn examines these 4 battles while explaining how the Soviets lost a third of their prewar army yet returned to beat one of the most highly trained and experienced armies the world has ever seen

SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II Breaking Point is the first in depth history of American psychiatry in World War II Drawn from unpublished primary documents oral histories and the author s personal interviews and correspondence over years with key psychiatric and military policymakers it begins with Franklin Roosevelt s endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations Ultimately 2 5 million men and women were rejected or discharged from military service on neuropsychiatric grounds Never before or since has the United States engaged in such a program In designing Selective Service Medical Circular No 1 psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening s validity psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs and Blacks and Native Americans among others complained of bias A frustrated General George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected **The Lost Divisions** Eli Ginzberg,1959
