Nitrogen Fixation:

Nitrogen Fixation John Raymond Postgate, 1998-10-15 This book provides an introductory level survey of biological nitrogen fixation covering the role of the process in the global nitrogen cycle as well as its biochemistry physiology genetics ecology general biology and prospects for its future exploitation *Catalysts for Nitrogen Fixation* Barry E. Smith, Raymond L. Richards, William E. Newton, 2013-03-20 Biological nitrogen fixation provides more than 50% of the total annual input of the essential element nitrogen to world agriculture Thus it is of immense agronomic importance and critical to food supplies particularly in developing countries This book with chapters authored by internationally renowned experts provides a comprehensive and detailed account of the fascinating history of the process including the surprising discoveries of molybdenum independent nitrogenases and superoxide dependent nitrogenase a review of Man s attempts to emulate the biological process most successfully with the commercially dominant Haber Bosch process and the current state of the understanding art with respect to the enzymes called nitrogenases responsible for biological nitrogen fixation The initial chapters use a historical approach to the biological and industrial processes followed by an overview of assay methodologies The next set of chapters focuses on the classical enzyme the molybdenum nitrogenase and details its biosynthesis structure composition and mechanism of action as well as detailing both how variants of its two component proteins are constructed by recombinant DNA technology and how computational techniques are being applied The sophisticated chemical modelling of the metal containing clusters in the enzyme is reviewed next followed by a description of the two molybdenum independent nitrogenases first the vanadium containing enzyme and then the iron only nitrogenase together with some thoughts as to why they exist Then follows an up to date treatment of the clearly non classical properties of the superoxide dependent nitrogenase which more closely resembles molybdenum containing hydroxylases and related enzymes like nitrate reductase that it does the other nitrogenases Each chapter contains an extensive list of references This book is the self contained first volume of a comprehensive seven volume series No other available work provides the up to date and in depth coverage of this series and this volume This book is intended to serve as an indispensable reference work for all scientists working in this area including agriculture and the closely related metals in biology area to assist students to enter this challenging area of research and to provide science administrators easy access to vital relevant information **Opportunities for Biological Nitrogen Fixation in Rice and Other Non-Legumes** J.K. Ladha, F.J. de Bruijn, K.A. Matson, Harold A. Mooney, 2002-08-12 Features review questions at the end of each chapter Includes suggestions for recommended reading Provides a glossary of ecological terms Has a wide audience as a textbook for advanced undergraduate students graduate students and as a reference for practicing scientists from a wide array of disciplines **Nitrogen Fixation in Plants** R. D. Dixon, Christopher T. Wheeler, 1986 THE IMPORTANCE OF NITROGEN FIXATION ON MANAGED AND NATURAL ECOSYSTEMS **Bacteria in Relation to Soil Fertility** Joseph Eames Greaves, Ethelyn O. Greaves, 1925 **Nitrogen Fixation: Biology and Ecology** Sara Langer, 2021-11-16 The process of converting atmospheric nitrogen into ammonia and other nitrogenous compounds in soil is termed as nitrogen fixation Most of the biological nitrogen is fixed by prokaryotic bacteria A few of these are cyanobacteria azotobacter azospirillum rhizobium and bradyrhizobium Clover soybean peanut etc are some of the plants which help in nitrogen fixation process These processes are part of the nitrogen cycle They are of utmost significance in agriculture as nitrogen is required for the synthesis of various organic compounds like amino acids nucleic acids and proteins Nitrogen is also fixed by natural phenomenon such as lightning It is also responsible for the formation of nitrogen oxides which may react with water to form nitrous acid or nitric acid The acids seep into the soil where they are converted into nitrates This book includes some of the vital pieces of work being conducted across the world on various topics related to nitrogen fixation From theories to research to practical applications case studies related to all contemporary topics of relevance to this field have been included in it This book is a vital tool for all researching or studying the biological and ecological aspects of nitrogen fixation as it gives incredible insights into emerging trends and concepts
