No Final Victories:

Letters, Power Lines, and Other Dangerous Things Ryan Ellis, 2020-03-03 An examination of how post 9 11 security concerns have transformed the public view and governance of infrastructure After September 11 2001 infrastructures the mundane systems that undergird much of modern life were suddenly considered soft targets that required immediate security enhancements Infrastructure protection quickly became the multibillion dollar core of a new and expansive homeland security mission In this book Ryan Ellis examines how the long shadow of post 9 11 security concerns have remade and reordered infrastructure arguing that it has been a stunning transformation Ellis describes the way workers civic groups city councils bureaucrats and others used the threat of terrorism as a political resource taking the opportunity not only to address security vulnerabilities but also to reassert a degree of public control over infrastructure Nearly two decades after September 11 the threat of terrorism remains etched into the inner workings of infrastructures through new laws regulations technologies and practices Ellis maps these changes through an examination of three U S infrastructures the postal system the freight rail network and the electric power grid He describes for example how debates about protecting the mail from anthrax and other biological hazards spiraled into larger arguments over worker rights the power of large volume mailers and the fortunes of old media in a new media world how environmental activists leveraged post 9 11 security fears over shipments of hazardous materials to take on the rail industry and the chemical lobby and how otherwise marginal federal regulators parlayed new mandatory cybersecurity standards for the electric power industry into a robust system of accountability

Sport and Revolutionaries John Nauright,David K Wiggins,2017-10-02 This collection examines the role of sport in the lives of key revolutionary thinkers and leftist activists In contrast to those who take a more romantic view of sport and believe in its apolitical nature the eight essays help make clear how sport has served as a site for political activism and the revolutionary thought and practices of such individuals as Henry Mayers Hyndman Vladimir Ilyich Lenin Fidel Castro Ernesto Che Guevara Harry Edwards Charles Perkins and Darius Dhlomo Written by noted scholars with long publication lists the essays in turn provide insights into the close connection among sport politics and revolutionary movements in countries varying widely in their history governmental policies and treatment of individuals and groups Taken as a whole the essays which adopt a very broad definition of revolutions are written with the hope of encouraging more serious thought regarding the transformative potential of sports which can be both individually liberating and responsible for co opting the lower classes and helping maintain power among the political and economic elite in capitalistic as well as socialist societies This book was published as a special issue of the International Journal of the History of Sport
