## **Politics Of Genetic Resource Control:**

The Politics of Genetic Resource Control A. Stenson, T. Gray, 1999-06-23 The question of how genetic resources ought to be owned and controlled has become a controversial international political issue The authors examine this issue from a normative perspective discussing the four principles that govern the debate over genetic resource control These four principles are proprietary intellectual property rights the dominant principle reflecting Western influences communitarian intellectual property rights a principle bound up with the rights of indigenous peoples national sovereignty the principle at the heart of international law and common heritage of mankind the most recent principle reflecting Third World demands

A Normative Analysis of the Politics of Genetic Resource Control Anthony Stenson, University of Newcastle upon Tyne. Department of Politics, 1998

**Shattering** Cary Fowler, Patrick R. Mooney, 1990 It was through control of the shattering of wild seeds that humans first domesticated plants Now control over those very plants threatens to shatter the world's food supply as loss of genetic diversity sets the stage for widespread hunger Large scale agriculture has come to favor uniformity in food crops More than 7 000 U S apple varieties once grew in American orchards 6 000 of them are no longer available Every broccoli variety offered through seed catalogs in 1900 has now disappeared As the international genetics supply industry absorbs seed companies with nearly one thousand takeovers since 1970 this trend toward uniformity seems likely to continue and as third world agriculture is brought in line with international business interests the gene pools of humanity's most basic foods are threatened The consequences are more than culinary Without the genetic diversity from which farmers traditionally breed for resistance to diseases crops are more susceptible to the spread of pestilence Tragedies like the Irish Potato Famine may be thought of today as ancient history yet the U S corn blight of 1970 shows that technologically based agribusiness is a breeding ground for disaster Shattering reviews the development of genetic diversity over 10 000 years of human agriculture then exposes its loss in our lifetime at the hands of political and economic forces The possibility of crisis is real this book shows that it may not be too late to avert it

The Oxford Handbook of Comparative Environmental Law Emma Lees, Jorge E. Viñuales, 2019-05-06 This Handbook is the first comprehensive account of comparative environmental law It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries from four vantage points country studies from all continents responses to common problems including air pollution water management nature conservation genetically modified organisms climate change and energy chemicals waste foundational components of environmental law systems including principles property rights administrative and judicial organisation command and control regulation market mechanisms informational techniques and liability mechanisms and common interactions of environmental protection with the broader public private and criminal law contexts The volume brings together the foremost authorities in this field from around the world to provide a concise self contained and technically rigorous account of environmental law as a single overall system

*Narratives of Hunger in International Law*

Anne Saab,2019-04-04 This book explores the role that the language of international law plays in constructing understandings or narratives of hunger in the context of climate change The story is told through a specific case study of genetically engineered seeds purportedly made to be climate ready Two narratives of hunger run through the storyline the prevailing neoliberal narrative that focuses on increasing food production and relying on technological innovations and private sector engagement and the oppositional and aspirational food sovereignty narrative that focuses on improving access to and distribution of food and rejects technological innovations and private sector engagement as the best solutions This book argues that the way in which voices in the neoliberal narrative use international law reinforces fundamental assumptions about hunger and climate change and the way in which voices in the food sovereignty narrative use international law fails to question and challenge these assumptions **The President and American Capitalism since 1945** Mark H. Rose,Roger Biles,2017-11-14 The book examines the development of the U S presidency since 1945 and describes the many ways some of which are unknown or greatly underappreciated in which the president s actions affect the daily lives of the American people *Breeding Disease-Resistant Horticultural Crops* Paul W. Bosland,Derek W. Barchenger,2023-09-08 Breeding Disease Resistant Horticultural Crops is a complete and comprehensive resource for understanding the concept of breeding disease resistant crops especially horticultural crops Breeders of horticultural crops face distinct challenges that are different from agronomy row crops and these crops do not benefit from the vast body of literature available for agronomic crops This book covers the basic theories that underpin breeding for disease resistance and features extensive real world examples Both classical and biotechnical breeding methods are covered with an emphasis on how these methods are adapted for horticultural species Presented in a logical flow for the reader this book addresses historical perspectives and context as it relates to breeding for disease resistance It highlights treatments of resistance in the context of the phenotype the genotype the pathogen the environment interaction sources of resistance and the deployment of resistance to obtain a durable resistance Explores the definition of horticultural resistance how it is inherited and how resistance can be manipulated through breeding Highlights the importance of the interaction among crops pathogens and environmental elements Provides the latest references and insights as a foundation for further research Intellectual Property and Traditional Knowledge in the Global Economy Teshager W. Dagne,2014-09-04 Arising from recent developments at the international level many developing countries indigenous peoples and local communities are considering using geographical indications GIs to protect traditional knowledge and to promote trade and overall economic development Despite the considerable enthusiasm over GIs in diverse quarters there is an appreciable lack of research on how far and in what context GIs can be used as a protection model for traditional knowledge based resources This book critically examines the potential uses of geographical indications as models for protecting traditional knowledge based products and resources in national and international intellectual property legal frameworks By analysing the reception towards GIs from developing

countries and advocates of development in the various legal and non legal regimes including the World Trade Organization World Intellectual Property Organization and the Convention on Biological Diversity and the Food and Agricultural Organization the book evaluates the development potential of GIs in relation to ensuing changes in international intellectual property law in accommodating traditional knowledge Teshager W Dagne argues for a degree of balance in the approach to the implementation of global intellectual property rights in a manner that gives developing countries an opportunity to protect traditional knowledge based products The book will be of great interest and use to scholars and students of intellectual property law public international law traditional knowledge and global governance

*Global Biopiracy* Ikechi Mgbeoji, 2007-10 *Global Biopiracy* rethinks the role of international law and legal concepts the Western based Eurocentric patent systems of the world and international agricultural research institutions as they affect legal ownership and control of plants and TKUP
