Community, Space and Online Censorship Scott Beattie, 2016-05-23 Internet censorship is a controversial topic while the media periodically sounds alarms at the dangers of online life the uncontrollable nature of the internet makes any kind of pervasive regulatory control impossible This book compares the Australian solution a set of laws which have been criticized as being both draconian and ineffectual to major regulatory systems in the UK and US and understanding what drives them The impossibility of internet regulation opens deeper issues what do we mean by regulation and how do we judge the certainty and effectiveness of law These questions lead to an exploration of the theories of legal geography which provide tools to understand and evaluate regulatory practices The book will be a valuable guide for academics students and policy makers working in media and censorship law those from a civil liberties interest and people interested in internet theory generally

Ranciere and Law Monica Lopez Lerma,Julen Etxabe,2017-11-06 This book is the first to approach Jacques Ranci re s work from a legal perspective A former student of Louis Althusser Ranci re is one of the most important contemporary French philosophers of recent decades offering an original and path breaking way to think politics democracy and aesthetics Ranci re s work has received wide and increasing critical attention but no study exists so far that reflects on the wider implications of Ranci re for law and for socio legal studies Although Ranci re does not pay much specific attention to law and there is a strong temptation to identify law with what he terms the police order much of Ranci re s historical work highlights the creative potential of law and legal language with important legal implications and ramifications So rather than excavate the Ranci rean corpus for isolated statements about the law this volume reverses such a method and asks what would a Ranci re inspired legal theory look like Bringing together specialists and scholars in different areas of law critical theory and philosophy this rethinking of law and socio legal studies through Ranci re provides an original and important engagement with a range of contemporary legal topics including constituent power and democracy legal subjectivity human rights practices of adjudication refugees the nomos of modernity and the sensory configurations of law It will then be of considerable interest to those working in these areas
