Polyethnicity And National Unity In World History:

Polyethnicity and National Unity in World History William Hardy McNeill,1986 [Polyethnicity and National Unity in World History](#) William H. McNeill,1986-11 Schools have taught us to expect that people should live in separate national states But the historical records shows that ethnic homogeneity was a barbarian trait civilized societies mingled peoples of diverse backgrounds into ethnically plural and hierarchically ordered polities The exception was northwestern Europe There peculiar circumstances permitted the preservation of a fair simulacrum of national unity while a complex civilization developed The ideal of national unity was enthusiastically propagated by historians and teachers even in parts of Europe where mingled nationalities prevailed Overseas European empires and zones for settlement were always ethnically plural but in northwestern Europe the tide has turned only since about 1920 and now diverse groups abound in Paris and London as well as in New York and Sydney Age old factors promoting the mingling of diverse populations have asserted this power and continue to do so even when governments in the ex colonial lands of Africa and Asia are trying hard to create new nations within what are sometimes quite arbitrary boundaries In demonstrating how unusual and transitory the concept of national ethnic homogeneity has been in world history William McNeill offers an understanding that may help human minds to adjust to the social reality around them

National Culture and the New Global System Frederick Buell,1994-09 The three worlds theory is perhaps still the basis for our dominant assumptions about geopolitical and geocultural order writes Frederick Buell but its hold on our imagination and faith is passing fast In its place a startlingly different model the notion that the world is somehow interconnected into a single system has emerged expressing the perception that global relationships constitute not three separate worlds but a single network In the wake of disillusionment with anticolonial nationalism and in response to a wide variety of economic political demographic and technological changes Buell argues we have come increasingly to view the world as complexly interconnected In National Culture and the New Global System he considers how the notion of national culture has been conceived and reconceived in the postwar period For much of the period the three world theory provided economic political and cultural models for mapping a world of nation states More recently new notions of interconnectedness have been developed ones that have had profound and sometimes startling effects on cultural production and theory Surveying recent cultural history and theory Buell shows how our understanding of cultural production relates closely to transformations in models of the world order
