No More Animals:

Animals, 1906 *Kantianism for Animals* Nico Dario Müller, 2022-08-16 This open access book revises Kant's ethical thought in one of its most notorious respects its exclusion of animals from moral consideration The book gives readers in animal ethics an accessible introduction to Kant's views on our duties to others and his view that we have only indirect duties regarding animals It then investigates how one would have to depart from Kant in order to recognise that animals matter morally for their own sake Particular attention is paid to Kant's Formula of Humanity the role of autonomy and the moral law as well as Kant's notions of practical reason and animal instinct The result is a deliberately amended version of Kantianism which nevertheless remains faithful to central aspects of Kant's thought The book's final part illustrates the framework's use in applied contexts addressing the issues of using animals as mere means the ethics of veganism and vegetarianism and environmental protection Nico Dario Müller shows how when furnished with duties to animals Kant's moral philosophy can be a powerful resource for animal ethicists **U.S. Forest Service Research Paper SO**, 1981 **A Day in a Working Life** Gary Westfahl, 2015-04-21 Ideal for high school and college students studying history through the everyday lives of men and women this book offers intriguing information about the jobs that people have held from ancient times to the 21st century This unique book provides detailed studies of more than 300 occupations as they were practiced in 21 historical time periods ranging from prehistory to the present day Each profession is examined in a compelling essay that is specifically written to inform readers about career choices in different times and cultures and is accompanied by a bibliography of additional sources of information sidebars that relate historical issues to present day concerns as well as related historical documents Readers of this work will learn what each profession entailed or entails on a daily basis how one gained entry to the vocation training methods and typical compensation levels for the job The book provides sufficient specific detail to convey a comprehensive understanding of the experiences benefits and downsides of a given profession Selected accompanying documents further bring history to life by offering honest testimonies from people who actually worked in these occupations or interacted with those in that field Report of the Chief of the Bureau of Animal Industry, United States Department of Agriculture United States. Bureau of Animal Industry, 1889 **Code of Federal Regulations**, 1970 Special edition of the Federal register containing a codification of documents of general applicability and future effect as of April 1 with ancillaries **The Minds and Manners of Wild Animals** William Temple Hornaday, 1923 **Money, Trade and Economic Growth** Harry Gordon Johnson, 1962 *The Westminster ...*, 1904 **The Starry Cross**, 1927 **Assessment of Technologies for Determining Cancer Risks from the Environment**, 1981 Mining Engineers' Handbook Robert Peele, 1927 **Environmental Law and Contrasting Ideas of Nature** Keith H. Hirokawa, 2014-07-17 Law's ideas of nature appear in different doctrinal and institutional settings historical periods and political dialogues Nature underlies every behavior contract or form of wealth and in this broad sense influences every instance of market transaction or governmental

intervention Recognizing that law has embedded discrete constructions of nature helps in understanding how humans value their relationship with nature This book offers a scholarly examination of the manner in which nature is constructed through law both in the hard sense of directly regulating human activities that impact nature and in the soft manner in which law s ideas of nature influence and are influenced by behaviors values and priorities Traditional accounts of the intersection between law and nature generally focus on environmental laws that protect wilderness This book will build on the constructivist observation that when considered as a culturally contingent concept nature is a self perpetuating and self reinforcing social creation
