Role Of Interest In Learning And Development:

The Role of Interest in Learning and Development K. Ann Renninger, Suzanne Hidi, 1992 Interest is just emerging as a critical bridge between cognitive and affective issues in both learning and development This developing interest in interest appears to be linked to an increasing concern for studying the individual in context examining affective variables as opposed to purely structural features of text analyzing the interrelationship of cognitive and social development understanding practical applications of theories of motivation and recognizing the importance of developmental psychology for the study of learning This book addresses both how individual interest and interest inherent in stimuli books text toys etc across subjects affect cognitive performance While the book s particular emphasis is on theory driven research each of the contributing authors offers a unique perspective on understanding interest and its effects on learning and development As such each has contributed a chapter in which particular questions in interest research are described and linked to a clearly stated theoretical perspective and recent findings Relevant material from the broader literatures of psychology and education are analyzed in the context of these discussions In addition the introductory and concluding chapters build on the contributions to the volume by providing the basis of a coherent view of interest across genres such as stories and expository text and domains as varied as play reading and mathematics

Developing Engaged Readers in School and Home Communities
Linda Baker, Peter Afflerbach, David Reinking, 2012-12-06 This book comprises a synthesis of current directions in reading research theory and practice unified by what has been referred to as the engagement perspective of reading This perspective guides the research agenda of the National Reading Research Center NRRC a consortium of the University of Georgia University of Maryland and affiliated scholars A major goal of the book is to introduce reading researchers to the engagement perspective as defined by the NRRC and to illustrate its potential to integrate the cognitive social and motivational dimensions of reading and reading instruction Engaged readers are viewed as motivated strategic knowledgeable and socially interactive They read widely for a variety of purposes and capitalize on situations having potential to extend literacy The book is organized into four sections representing key components of the NRRC research agenda and the engagement perspective This perspective emphasizes contexts that influence engaged reading Accordingly the first section of the volume focuses on the social and cultural contexts of literacy development with chapters devoted to examining home influences home school connections and the special challenges facing ethnic minorities The engagement perspective also implies greater attention to the role of motivational and affective dimensions in reading development than traditional views of reading Therefore the second section examines motivational theory and its implications for reading engagement with special attention to characteristics of classroom contexts that promote motivation in reading The engagement perspective embraces innovative instructional contexts that address the cognitive social and motivational aspects of reading Thus the third section includes chapters on current directions in promoting children s learning from text

on the value of an integrated curriculum in promoting reading engagement and on the challenges of assessing students development as engaged readers Finally the broader conception of reading implied by the engagement perspective requires an expanded array of research approaches sensitive to the complex and interacting contexts in which children develop literacy The concluding section focuses on these important contemporary issues in literacy research and educational research with chapters examining the variety of alternative modes of inquiry gaining prominence in literacy research teacher inquiry and ethical issues of collaboration between university and teacher researchers Intended for university based researchers graduate students and classroom teachers this volume brings together researchers who think about students and their literacy development in school and home communities in distinctly different ways The cooperative and collaborative inquiry presented contributes to a richer understanding of the many factors influencing engaged reading Handbook of Communication and Social Interaction Skills John O. Greene, Brant Raney Burleson, 2003 A comprehensive handbook covering social interaction skills skill acquisition in the context of personal professional and public stages For scholars students in interpersonal group family health communication **Handbook of Reading Research** Michael L.
