100 BC - AD 100 Andreas J. M. Kropp, 2013-06-27 An archaeological and art historical study of the images and monuments of Roman client kings in the Near East from the Taurus to Edom during the transitional period between 100 BC and AD 100 Kropp treats images and monuments as historical documents and aims at uncovering royal identities and ideological aspirations **The Religious Life of Nabataea** Peter Alpass, 2013-06-13 Flourishing in the centuries around the birth of

Christ the Nabataean kingdom covered a large swathe of the north western Arabian Peninsula and was shaped by cultural influences from the Mediterranean Arabian and wider Semitic worlds The Religious Life of Nabataea examines the inscriptions sculptures and architectural remains left by worshippers in every corner of the kingdom from the spectacular

remains of the desert city of Petra to the fertile plains of southern Syria While previous scholarly approaches have minimised the diversity of cultic practices and traditions found in Nabataea this study reveals a vibrant religious landscape dominated by a variety of local traditions

Temples and Sanctuaries in the Roman East Arthur Segal,2013-10-31 This lavishly illustrated volume presents a comprehensive architectural study of 87 individual temples and sanctuaries built in the Roman East between the end of the 1st century BCE and the end of the 3rd century CE within a broad region encompassing the modern states of Syria Lebanon Israel and Jordan Religious architecture gave faithful expression to the complexity of the Roman East and to its multiplicity of traditions pertaining to ethnic and religious aspects as well as to the powerful influence of Imperial Rome The source of this power lay in the uniformity of the architectural language the inventory of forms the choice of styles and the spatial layout of the buildings Thus while temples have an eclectic character there is an underlying unity of form comprising the podium the stairway between the terminating walls antae and the columns along the entrance front in other words the axuality frontality and symmetry of the temple as viewed from outside The temples and sanctuaries studied in this volume demonstrate individual nuances of plan spatial design location in the sanctuary and interrelations with the immediate vicinity but can be divided into two main categories Vitruvian temples derived from Hellenistic Roman architecture and Non Vitruvian temples those with plans and spatial designs that cannot be analysed according to architectural criteria such as those defined by Vitruvius The individual descriptions presented focus solely upon the analysis of the external and internal space of the temples of all types and do not involve any cultural or ethnic discussion
