Population Control:

Population Control Steven Mosher, 2011-12-31 For over half a century policymakers committed to population control have perpetrated a gigantic costly and inhumane fraud upon the human race They have robbed people of the developing countries of their progeny and the people of the developed world of their pocketbooks Determined to stop population growth at all costs those Mosher calls population controllers have abused women targeted racial and religious minorities undermined primary health care programs and encouraged dictatorial actions if not dictatorship They have skewed the foreign aid programs of the United States and other developed countries in an anti natal direction corrupted dozens of well intentioned nongovernmental organizations and impoverished authentic development programs Blinded by zealotry they have even embraced the most brutal birth control campaign in history China s infamous one child policy with all its attendant horrors There is no workable demographic definition of overpopulation Those who argue for its premises conjure up images of poverty low incomes poor health unemployment malnutrition overcrowded housing to justify anti natal programs The irony is that such policies have in many ways caused what they predicted a world which is poorer materially less diverse culturally less advanced economically and plagued by disease The population controllers have not only studiously ignored mounting evidence of their multiple failures they have avoided the biggest story of them all Fertility rates are in free fall around the globe Movements with billions of dollars at their disposal not to mention thousands of paid advocates do not go quietly to their graves Moreover many in the movement are not content to merely achieve zero population growth they want to see negative population numbers In their view our current population should be reduced to one or two billion or so Such a goal would keep these interest groups fully employed It would also have dangerous consequences for a global environment

Subcommittee on Constitutional Amendments, 1974 *The Politics of Population Control* Thomas B Littlewood, 1979-02 *Genres of Emergency* Ayelet Ben-Yishai, 2023 *Genres of Emergency* offers literary genre as a way to understand and negotiate the varied states of emergency and crisis that have become a fixture of our contemporary world Building on a critical study of the literature written during and about the State of Emergency declared by Prime Minister Indira Gandhi in India 1975 1977 the study establishes emergency and its genres as an important interpretative site an exceptionally violent episode marked as a one off crisis which also functions as a locus for an ongoing renegotiation of a modern polity and culture Reading a wide ranging archive of English language texts from prison memoir to popular magazine from high brow literary fiction to boilerplate thriller from the unrelentingly realistic to the mythically allegorical *Genres of Emergency* traces the tension between crisis and continuity that these genres mediate In addressing this tension the authors of *Emergency* fiction take seriously the genres in which they write and use them to mobilize literary conventions as political interventions More specifically these novels use the conventions of realism epic allegory and the thriller to reach back in time and across cultures and languages

invoking past iterations of these genres and histories and anticipating those to come Combining literary criticism with cultural history Genres of Emergency thus has implications for the study of literary genre for the historical events that these genres recount and for understanding the politics of literary form **The Fall of the West** Nicholas Hagger,2022-11-25 In The Syndicate 2004 Nicholas Hagger described how in the 20th century a Syndicate of litist mega rich families levelled down the leading Western countries by promoting revolutions wars and independence movements against their empires and planned a New World Order and world government that would control the earth s resources for their own benefit In The Secret History of the West 2005 he traced the Syndicate s roots back to secret Freemasonic organisations and revolutions that undermined the West from the Renaissance to the early 20th century In The Fall of the West 2022 the third book in his trilogy on the West Hagger updates the story to include the pandemic and describes how Syndicate driven 21st century events from the War on Terror to Covid have brought the Western financial system to the brink of collapse and shifted power from the West to the East and China In this first impartial attempt to assemble all the evidence to date for the origin of Covid like fitting together available pieces of a jigsaw to reveal the main picture Hagger the first to discover the Cultural Revolution in China in March 1966 finds that the three main features of Covid 19 were man made by American NIAID funded medics in 2002 and patented 73 times since 2008 and seem to have been surreptitiously used as a bio weapon in a Syndicate plan to limit the rise of China and its expanding trade A dangerous new Biological Age has been born and the West faces being levelled down and a sudden fall Hagger sees the post Covid West s dream of creating a good New World Order a vaccine protected democratic presidential part federal world government and World State with sufficient authority to abolish war and solve the world s post Covid problems as being challenged by the self interested Syndicate s levelling down and to survive it first has to go along with the Syndicate s plan for West and East to draw together into an authoritarian world government involving China and democratise later This is a thought provoking work with a prophetic vision of the future

Human Population Control Paul F. Kisak, 2015-12-14 Human population control is the practice of artificially altering the rate of growth of a human population. Historically, human population control has been implemented with the goal of increasing the rate of population growth. In the period from the 1950s to the 1980s, concerns about global population growth and its effects on poverty, environmental degradation, and political stability led to efforts to reduce population growth rates. While population control can involve measures that improve people's lives by giving them greater control of their reproduction, a few programs, most notably the Chinese government's one-child policy, have resorted to coercive measures. This book discusses the various methods and impacts of human population control.
