Personal Valuing Dale D. Simmons,1982 **Personal Valuing** Dale D. Simmons,1982 **Personal Value** Toni Rønnow-Rasmussen,2011-06-23 Certain things like justice have impersonal value Other things like your parents carry personal values they have value for you Besides whatever value they have they are valuable to you The philosophical literature as well as non philosophical literature is inundated with suggestions about the kinds of thing that are good for us or if it is a negative personal value what is bad for us This is a stimulating and vivid area of philosophical research but it has tended to monopolize the notion of good for linking it necessarily to welfare or well being Since these more or less well grounded pieces of advice are seldom accompanied by an analysis of the notion of good for there is a need for such an analysis R nnow Rasmussen remedies this need by offering a novel way of analyzing the notion of personal value He defends the idea that we have reason to expand our classical value taxonomy with these personal values By fine tuning a pattern of value analysis which has roots in the writings of the Austrian philosopher Franz Brentano this sort of analysis will come to cover personal values too In addition R nnow Rasmussen makes substantial contributions to a number of issues including hedonism vs preferentialism subjectivism vs objectivism value bearer monism vs value bearer pluralism and the wrong kind of reason problem all of which are much debated among today s value theorists [Introducing Property Valuation](#) Michael Blackledge,2016-09-13 This new edition of bestselling textbook *Introducing Property Valuation* provides students with a comprehensive introduction to the concepts and methods of valuing real estate helping them to progress successfully from basic principles to a more sophisticated understanding Taking a practically oriented rather than purely theoretical approach the textbook equips readers with the skills to undertake their own valuation calculations Fully updated to reflect recent developments in regulation and practice experienced tutor and valuer Michael Blackledge demonstrates how the principles can be applied in professional practice in line with the requirements and guidance provided by the International Valuation Standards Council and the Royal Institution of Chartered Surveyors Online material accompanies the new edition with Q As and pre programmed excel spreadsheets enabling students to prepare their own calculations The five traditional methods of valuation are outlined and the practical applications of the two main approaches the comparison and investment methods are fully explored The use of discounted cash flow and quarterly in advance calculations topics which are not always adequately covered elsewhere are also explained Accessibly written with a full range of worked examples case studies clear chapter summaries and extensive further reading suggestions this book is essential for any student of real estate and its valuation
