## **Personhood Creativity And Freedom:**

*Personhood, Creativity, and Freedom* Eliot Deutsch, 1982-01-01      *Freedom in Resistance and Creative Transformation* Michael St. A. Miller, 2013-04-11

In *Freedom in Resistance and Creative Transformation* Michael Miller addresses the concept of freedom that is central to the grammar of Christian faith and important in a wide range of religious and nonreligious settings across the globe. He confronts the fact that despite the claimed importance of freedom there continues to be interpersonal socio political and religious power hierarchies that keep some people dominant and others subjugated. The book suggests that often these hierarchies are informed by Christian teachings that deny freedom to human beings on the basis of their humanity per se. Having classified humanity as fallen we are instructed that freedom is experienced by disparaging our humanity as we actually experience it seeing ourselves as our own worst enemies and accepting bondage to God the bondage reflected in the character of relations with those seen as God's special representatives in the world. Miller presents a case against this understanding of the human situation and in the process he critically engages the Old and New Testaments along with ideas of significant representatives of Christian orthodoxy. As an alternative he promotes freedom that is finite realistically libertarian and relational as most compatible with the character of human beings that are partially self creating and self determining. Contributing to this position is the view that an infinitely temporal God by character and desire participates in human life in a way that ensures the requisite space for authentic decision making from which emerges genuinely novel possibilities for human life. This dynamic has implications for the continued development of the human species and the quality of life in the cosmos as a whole.

**Self-deception and Morality** Mike W. Martin, 1986

This book systematically explores the moral issues surrounding self deception. While many articles and books have been written on the concept of self deception in recent years Martin's gives much greater emphasis to self deception as a significant topic for both ethical theory and applied ethics. Self deception is perplexing from a moral point of view. It seems tailor made to camouflage and foster immorality. Does all self deception involve some guilt and is it among the most abhorrent evils as some moralists and theologians have charged. Or is it only wrong sometimes such as when it has bad consequences. Could it on occasion be permissible or even desirable to deceive ourselves just as we are sometimes justified in deceiving other people. Are self deceivers perhaps more like innocent victims than perpetrators of deceit and as such deserving of compassion and help. Or paradoxically are they best viewed with ambivalence culpable as deceivers and simultaneously innocent as victims of deception. From the introduction Martin develops a conception of self deception as the purposeful evasion of acknowledging to oneself truths or one's view of truth. He details a systematic framework for understanding the main moral perspectives and traditions concerning self deception that have emerged in western philosophy. In so doing he clarifies related concepts like sincerity authenticity honesty hypocrisy weakness of will and self understanding. Ranging across traditions both philosophical Kant Kierkegaard and Sartre and non philosophical Freud Eugene O'Neill and Henrik Ibsen Martin shows why self deception

is as morally complex as any other major form of behavior The appeal of this book is broad The volume will challenge professional philosophers and psychologists yet it is organized and written to be accessible to students in courses on ethics philosophy of mind and philosophy of literature Martin s numerous literary examples should also interest literary critics

**Life Creative Mimesis of Emotion** Anna-Teresa Tymieniecka,2000 Are emotions feelings sentiments not the stuff of literature There it is where they project their inner logic of aesthetic transmutation there beyond the instrument of language that they command This collection explores how the lyrical virtualities of life experience and the elegiac style in literature share a common core lifting the human significance of life from abysmal vitality to esoteric heights from abysmal grief to a serene reconciliation with destiny The elegiac sequence in the play of emotions feelings and sentiments brings together life and literary creativity in its transformatory power *Philosophical Books* ,1983 [Philosophy Books, 1982-1986](#) Thomas May,1991 [Objects and Imagination](#) Øivind Fuglerud,Leon Wainwright,2015-02-01 Despite the wide interest in material culture art and aesthetics few studies have considered them in light of the importance of the social imagination the complex ways in which we conceptualize our social surroundings This collection engages the material turn in the arts humanities and social sciences through a range of original contributions on creativity in diverse global and contemporary social settings The authors engage with everyday objects art rituals and ethnographic exhibitions to analyze the relationship between material culture and the social imagination What results is a better understanding of how the material embodies and influences our idea of the social world

**After Our Likeness** Miroslav Volf,1997-10-30 In After Our Likeness the inaugural volume in the Sacra Doctrina series Miroslav Volf explores the relationship between persons and community in Christian theology The focus is the community of grace the Christian church The point of departure is the thought of the first Baptist John Smyth and the notion of church as gathered community that he shared with Radical Reformers Volf seeks to counter the tendencies toward individualism in Protestant ecclesiology and to suggest a viable understanding of the church in which both person and community are given their proper due In the process he engages in a sustained and critical ecumenical dialogue with the Catholic and Orthodox ecclesiologies of Joseph Cardinal Ratzinger and the metropolitan John Zizioulas The result is a brilliant ecumenical study that spells out a vision of the church as an image of the triune God

**Subjectivity Transformed** Thomas Vesting,2023-11-28 This book provides a historically informed reconstruction of the social practices that have shaped the formation of the modern subject from the early modern period to the present The formal legal protections accorded to subjects are and always have been latent in social practices norms and language before they are articulated in formal legal orders Vesting argues that in Western societies legal personhood is closely tied to three ideal types of social personhood what he calls the gentleman the manager and Homo digitalis By examining these three ideal types and their emergence in society we can see that Western formal law does not bring these ideal types into being but on the contrary they arise from the social and cultural conditions that they generate and reflect Correspondingly Western legal personhood or legal

subjectivity arises from the history and culture of Western nations not the other way around Therefore signature features of Western formal law particularly its valorization of the rights of persons whether natural or nonnatural come from the particular sociohistorical cultural developments that had already generated the strong ideas of social personhood inherent in the ideal types of the gentleman the manager and Homo digitalis Subjectivity Transformed is a major contribution to legal and social theory and with its original analysis of the formation of modern subjectivity it will be of interest to students and scholars throughout the social sciences and humanities *Philosophy, Society, and Action* Kanhaiya Lal Sharma, 1984 Festschrift honoring Daya Krishna b 1924 professor of philosophy comprises contributed articles *Personal Transformation and a New Creation* Delio, Ilia ,2016-08-18 Top scholars examine the theories of Pierre Teilhard de Chardin through the lens of Beatrice Bruteau s pioneering work on evolution and consciousness Contributors include Cynthia Bourgeault Ursula King Barbara Fiand Kerrie Hide Gabrielle Stoner Kathleen Duffy John Shea Carla De Sola and Joshua Tysinger *Philosophy East & West* ,2000 **Phenomenology: East and West** Frank M. Kirkland, D P Chattopadhyaya, 1993 To know the work of Jitendra Nath Mohanty even slightly is to commence to appreciate it immensely Lucidity and sagacity have been its armor originality and ingenuity have been its strength And wearing the former and wielding the latter have become so persistent a mark of his work as to suggest that their appeal for Mohanty lies altogether more in the refined reaches of philosophical craftsmanship than on the coarse ground of intellectual partisanship The multifaceted character of his work in phenomenology and Indian philosophy has never left us palled by its significance and as a consequence has always left us conceding its command on our philosophical discourse It has fulfilled the most welcomed promise of striking the chords of both imagination and reason by exposing Husserlian phenomenology to the concerns of both the so called analytical and continental traditions and by exposing the philosophical tradition of Indian thought to the intricacies of Husserl Although charting and periodizing the body of Mohanty s work in phenomenology may be the function of a memory inconspicuous for originality and liveliness they nonetheless offer a precise conspicuous for the variety of topics that Mohanty has both engaged and enriched Mohanty s career in phenomenology can be characterized by three phases each concentrating on different themes but with the latter two also epitomizing a more incisive and deeper discussion of the issues raised in the first *Reason and Life* Kim W. Rogers, 2003-07-14 Reason and Life begins with a critical historical examination of past forms of reason Ancient and Modern as well as more recent contenders Existentialism Phenomenology the New Marxism All of these are critiqued as not capable of adequately interpreting life that is the interaction of living beings and their environment because of their fixation upon the role of the being in itself the knower the individual consciousness The author suggest as an alternative approach replacing Modern reason with a reason vital or an organismic approach initially present in the writings of Jose Ortega y Gasset and Kurt Goldstein but also to some degree in the works of a few later philosophers and psychologists of the twentieth century To adopt the interactions of living beings and their

environments as one's starting point is what the author calls following the usage of J J Gibson an ecological approach

*Creative Being* Eliot Deutsch, 1992-09 A person I want to argue is not a given but an achievement So opens Eliot Deutsch's provocative study a work that sets forth new possibilities for understanding the nature of creativity and the means by which human beings fashion themselves and their worlds Professor Deutsch develops an innovative way of moving beyond the limitations of traditional rationalism empiricism and analytical philosophy of mind to frame a new conception of what it means to be a person

The Philosopher's Index, 1991 Vols for 1969 include a section of abstracts *Philosophy, Religion, and Contemporary Life* Leroy S. Rouner, James R. Langford, 1996 These essays examine how some perennial problems in philosophy and religion are significant for understanding contemporary life Issues discussed include capitalism public philosophy man made mass death psychoanalysis feminism fundamentalism and the desire to be happy *Transculturality* Hans Jörg Sandkühler, 2004 The concept of transculturality no longer assumes that cultures are homogenous unities with stable borders Borders are no longer given be it through nation ethnicity religion or tradition or homogenous subject identities etc Rather they emerge and change through the dynamics and complexity of flexibly coexisting networks between persons To this degree cultures are agendas within which one thinks and according to which one wants to act in solidarity with others because more than one person is convinced of its worth for the shaping of life This is the context within which Korean and German philosophers social scientists and cultural scientists together and in an atmosphere of openness and learning pursue their interests in philosophical questions about human existence about understanding and knowledge and in problems of society law democracy and state There are topics to be discussed these days not in isolation from one another but transculturally which are topics of that one world universal and local discourses on culture transculturality and cultural differences in the age of globalization the role of religions within cultures the possibility of transcultural communication public rationality transcultural justice and the universality of human rights
