**New Feminist Perspectives on Embodiment** Clara Fischer, Luna Dolezal, 2018-02-16 Despite several decades of feminist activism and scholarship women s bodies continue to be sites of control and contention both materially and symbolically Issues such as reproductive technologies sexual violence objectification motherhood and sex trafficking among others constitute ongoing pressing concerns for women s bodies in our contemporary milieu arguably exacerbated in a neoliberal world where bodies are instrumentalized as sites of human capital This book engages with these themes by

building on the strong tradition of feminist thought focused on women's bodies and by making novel contributions that reflect feminists' concerns both theoretically and empirically about gender and embodiment in the present context and beyond. The collection brings together essays from a variety of feminist scholars who deploy diverse theoretical approaches including phenomenology, pragmatism, and new materialisms in order to examine philosophically the question of the current status of gendered bodies through cutting-edge feminist theory.

*Mind, Brain and Narrative* Anthony J. Sanford, Catherine Emmott, 2012-12-20. An examination of the scientific evidence for the mechanisms which underlie the effect a writer's language has on the reader.

*Embodied Communication in Humans and Machines* Ipke Wachsmuth, Manuela Lenzen, Günther Knoblich, 2008-09-04. When people communicate face to face they don't just exchange verbal information. Rather, communication encompasses the whole body. Communication partners synchronize their body sway and mimic or imitate each other's body postures and actions. They produce a multitude of manual and facial gestures that help to illustrate what is being said, show how communication partners feel, or reveal verbal deception. Moreover, face-to-face communication takes place in shared contexts where partners jointly attend and refer to the same objects, often while working on joint tasks such as carrying a table or repairing a car together. Traditionally, communication research has neglected these parts of communication, using the engineering model of signal transmission as the main theoretical metaphor. This book takes a new look at recent empirical findings in the cognitive and neurosciences, showing that the traditional approach is insufficient and presenting a new interdisciplinary perspective: the Embodied Communication perspective. The core claim of the Embodied Communication perspective is that human communication involves parallel and highly interactive couplings between communication partners. These couplings range from low-level systems for performing and understanding instrumental actions like the mirror system to higher systems that interpret symbols in a cultural context. The book can also serve as a guide for engineers who construct artificial agents and robots that should be able to interact with humans.

**Christian Scholar's Review**, 2006. **Lost Selves and Lonely Persons** Anne Sigfrid Grønseth, 2010. This ethnography is based on a long-term field study of experiences of illness and wellbeing as Tamil refugees resettled in one of the small fishing villages along the arctic coast of northern Norway. Departing from a medical model, the study expands to a client-centered model that focuses on the Tamils' experiences in everyday life as they move between Tamil and Norwegian social worlds. The author argues that Tamil illness is not only a biomedically defined reference to traumatic and individualized explanations but is also defined by tensions in embodied expectations and perceptions in ongoing social life. The book addresses migrant experiences of loss of embodied meaning, identity, and belonging together with the often-present stigma and low social status in the local community. While going beyond Tamil pain and illness, the study demonstrates how the Tamils exert a complex agency that allows them to pursue their core values as well as human existential needs in a quest for wellbeing and success. This book is part of the Ethnographic Studies in Medical Anthropology Series, edited by Pamela J. Stewart and Andrew Strathern.
