Why a Second-Person Gaming Perspective Is Not Possible* Narmin Khalilova,2025-04-30 Seminar paper from the year 2025 in the subject Philosophy Miscellaneous Sofia University St Klimment Ohridski language English abstract The question of subjectivity has always been central to philosophy but with the advent of digital technologies new frameworks for

understanding the self have emerged One particularly intriguing challenge comes from gaming perspectives can a second person perspective exist within a video game This is not merely a technical or artistic question it is a deep philosophical problem concerning self awareness agency and the nature of observation Traditional gaming perspectives fall into first person where the player experiences the world directly through a character s eyes or third person where they observe the character from an external viewpoint The second person perspective by contrast presents a paradox In linguistics the second person refers to you implying direct address and interaction but when translated into gaming this creates an epistemological and ontological tension who is the observer and who is being observed This paper argues that a sustained second person perspective in gaming is impossible not merely for technical reasons but because it contradicts the fundamental structures of human subjectivity This small research project also functions as a supplementary exploration alongside my MA thesis on human embodiment which is why I find Varela Husserl and Merleau Ponty particularly compelling in their examination of this subject
