African Americans and Mass Media Richard T. Craig, 2014-12-23 In *African Americans and Mass Media* Richard T. Craig explores the relationship among the lack of media ownership diversity in addition to the political and economical influences and policy developments influencing media ownership. Craig also addresses the concern of growing media monopolies and the decline in minority media ownership since the passing of the Telecommunications Act of 1996. Focusing the policy argument on this act and the deregulation of media ownership, this book explores the jeopardy jeopardizing of diminished as well as the influence on content. *Observing Black Entertainment Television BET* in the last five years of African American ownership and the first five years of conglomerate ownership paralleling the first decade after the Telecommunications Act was passed. The book includes information about the changes made to information programming on the network. Craig asserts that despite the overwhelming presence of African Americans holding executive positions with the network, Viacom BET's current owner influences the network's programming and relegates the cultural identity of the network to profit interests. BET is observed as a case study reflective of the importance of ethnic media and perspectives reflective of cultural ethnic identities targeting ethnic audiences. *African Americans and Mass Media* chronicles the significance of ethnic media, drawing particular attention to African American media in the United States and advocates for increased communication policy development bolstering minority ownership.

Measures for Community and Neighborhood Research Mary L. Ohmer, Claudia Coulton, Darcy A. Freedman, Joanne L. Sobeck, Jaime Booth, 2018-07-19 *Measures for Community and Neighborhood Research* is the first book of its kind to compile measures focused on communities and neighborhoods in one accessible resource. Organized into two main sections, the first provides the rationale, structure, and purpose and analysis of methodological issues along with a conceptual and theoretical framework. The second section contains 10 chapters that synthesize, analyze, and describe measures for community and neighborhood research with tables that summarize highlighted measures. The book will get readers thinking about which aspects of the neighborhood may be most important to measure in different research designs and also help researchers, practitioners, funders, and others more closely examine the impact of their work in communities and neighborhoods.
