Real Self A Developmental Self And Object Relations Approach:

The Real Self James F. Masterson, M.D.,2013-08-21 First Published in 1985 This informative volume examines the clinical research linking normal separation individuation with object relations theory and developmental psychopathology It focuses on the core problem the lack of a concept of the self integrated with object relations theory By adding a theory of the self to object relations theory the book both enlarges and more acutely focuses the therapeutic perspective thereby enhancing work with patients It also further enables therapists to clarify their own real selves Dr Masterson's thesis is that for the real self to finally emerge from the symbiotic union and assume its full capacities identification acknowledgment and support are required from the mother and father in early development and from the therapist in psychotherapy Dr Masterson describes and illustrates the therapeutic technique of communicative matching and provides the necessary acknowledgment while maintaining therapeutic neutrality Part I reviews psychoanalytic theory of the ego and the emerging real self its structure function development and its psychopathology and treatment Part II explores the relationship between maternal libidinal acknowledgment and the development of the real self by a cross cultural comparison of child raising in Japan Israel and the United States It then describes the influence of social and cultural factors on the functioning of the real self in the United States Part III on Creativity and the Real Self draws upon fairy tales Jean Paul Sartre Edvard Munch and the life and work of the novelist Thomas Wolfe to show how for some artists creativity becomes a crucial vehicle in their search to establish a real self This section illuminates the nature of personal and artistic creativity and describes how a professional interest in the functioning of the real self leads inevitably to an interest in the ultimate of self expression creativity Of special interest are the numerous case illustrations drawn from Masterson's extensive clinical work showing how acknowledgment and support enable the real self to fully emerge from the symbiotic union and to assume its full capacities

Self-in-Relationship Psychotherapy Augustine Meier, Micheline Boivin, 2022-07-29 In this innovative book the authors set out their theory of Self in Relationship Psychotherapy SIRP advocating for the integration of relational self and physical intimacy needs in the conceptualization and treatment of psychological problems placing human needs at the center of treatment This marks a shift in how psychological and relational problems are understood currently being perceived in terms of affects cognitive processes and behaviors Using numerous illustrations from their own clinical practice Meier and Boivin contend that this understanding overlooks the pivotal role that needs play in all aspects of people's personal lives and relationships Children adolescents and adults do not live primarily from feelings and thoughts but from basic psychological and relational needs such as wanting to be in a meaningful relationship having the autonomy and freedom to make decisions about their lives experiencing being competent being regarded as a significant and important person and experiencing emotional intimate and sensual and or sexual connections By taking such an approach this book stands out among other books on psychotherapy theories Authored by two seasoned psychologists who have provided therapeutic services to children adolescents and adults for 40 years this book comprises the foundational theory for practicing Self in Relationship Psychotherapy making it of interest to graduate students clinicians in training and practicing psychologists social workers and psychotherapists alike

Sartre and Psychoanalysis Betty Cannon, 1991 Betty Cannon is the first to explore the implications of Sartrean philosophy for the Freudian psychoanalytic tradition Drawing upon Sartre's work as well as her own experiences as a practicing therapist she shows that Sartre was a fellow traveler who appreciated Freud's psychoanalytic achievements but rebelled against the determinism of his metatheory The mind Sartre argued cannot be reduced to a collection of drives and structures nor is it enslaved to its past as Freud's work suggested Sartre advocated an existentialist psychoanalysis based on human freedom and the self's ability to reshape its own meaning and value Through the Sartrean approach Cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs By comparing Sartre with Freud and influential post-Freudians like Melanie Klein Otto Kernber Margaret Mahler D W Winnicott Heinz Kohut Harry Stack Sullivan and Jacques Lacan she demonstrates why the Sartrean model transcends the limitations of traditional Freudian metatheory

In the process she adds a new dimension to our understanding of Sartre and his place in twentieth century philosophy

Until now little attention has been paid to the application of contemporary psychoanalytic theory to religious experiences In this edited collection the contributors provide examples that illustrate both theoretical insights and clinical techniques that are relevant to clinicians who face religious issues in psychotherapy This work follows in the footsteps of Ana Maria Rizzuto who took the bold step of employing object relations theory to the clinical study of an individual s religious representations and argued that religious representations profoundly reveal a person s relational world Dr Rizzuto provides a detailed afterword for this volume While several of the authors maintain religious commitments which vary from Christian to Jewish to Buddhist a critique of the recruitment of object relations theory in the service of religious apologetics is also included The importance of a religious aspect to psychoanalysis becomes evident when we consider whether an effective therapy with the religiously committed patient is possible without the clinician s willingness to accept that God and other religious experiences are real phenomena exerting a unique impact upon the personality Or when we ask if by thinking too concretely and too statically about images of God the clinician who is also a believer errs by focusing on the theological adequacy or inadequacy of a given representation This book will interest mainstream clinicians who are eager to pursue the psychology of religion as well as the traditional pastoral counseling community

Psychiatric Inpatient Care of Children and Adolescents Robert L. Hendren, Irving N.
