Representations Of Reductive Groups:

Representations of Reductive Groups Roger W. Carter,Meinolf Geck,1998-09-03 This volume provides a very accessible introduction to the representation theory of reductive algebraic groups Unitary Representations of Reductive Lie Groups David A. Vogan,1987-10-21 This book is an expanded version of the Hermann Weyl Lectures given at the Institute for Advanced Study in January 1986 It outlines some of what is now known about irreducible unitary representations of real reductive groups providing fairly complete definitions and references and sketches at least of most proofs The first half of the book is devoted to the three more or less understood constructions of such representations parabolic induction complementary series and cohomological parabolic induction This culminates in the description of all irreducible unitary representation of the general linear groups For other groups one expects to need a new construction giving unipotent representations The latter half of the book explains the evidence for that expectation and suggests a partial definition of unipotent representations **Representation Theory of Reductive Groups** Trombi,2013-03-13 This volume is the result of a conference on Representation Theory of Reductive Groups held in Park City Utah April 16 20 1982 under the auspices of the Department of Mathematics University of Utah Funding for the conference was provided by the National Science Foundation The text includes a number of original papers together with expository articles on work already in print It is hoped that the volume will be of use to both experts in the field and nonspecialists interested in obtaining some insight into the area Principal organizers of the conference were Henryk Hecht Dragan Mili ie and Peter Trombi They would like to express their thanks to the National Science Foundation for their support to the speakers for their diligence in submitting their manuscripts and to Carla Curtis Karen Edge and Katherine Ruth for typing the manuscripts which were contributed v CONTENTS J Arthur Multipliers and a Paley Wiener theorem for real reductive groups Characters of Reductive Groups over a Finite Field. (AM-107), Volume 107 George Lusztig,2016-03-02 This book presents a classification of all complex irreducible representations of a reductive group with connected centre over a finite field To achieve this the author uses etale intersection cohomology and detailed information on representations of Weyl groups **Representations of Reductive Groups** Monica Nevins,Peter E. Trapa,2015-12-18 Over the last forty years David Vogan has left an indelible imprint on the representation theory of reductive groups His groundbreaking ideas have lead to deep advances in the theory of real and p adic groups and have forged lasting connections with other subjects including number theory automorphic forms algebraic geometry and combinatorics Representations of Reductive Groups is an outgrowth of the conference of the same name dedicated to David Vogan on his 60th birthday which took place at MIT on May 19 23 2014 This volume highlights the depth and breadth of Vogan s influence over the subjects mentioned above and point to many exciting new directions that remain to be explored Notably the first article by McGovern and Trapa offers an overview of Vogan s body of work placing his ideas in a historical context Contributors Pramod N Achar Jeffrey D Adams Dan Barbasch Manjul Bhargava

Wallach,1988-03-01 Real Reductive Groups I is an introduction to the representation theory of real reductive groups It is based on courses that the author has given at Rutgers for the past 15 years It also had its genesis in an attempt of the author to complete a manuscript of the lectures that he gave at the CBMS regional conference at The University of North Carolina at Chapel Hill in June of 1981 This book comprises 10 chapters and begins with some background material as an introduction The following chapters then discuss elementary representation theory real reductive groups the basic theory of g K modules the asymptotic behavior of matrix coefficients The Langlands Classification a construction of the fundamental series cusp forms on G character theory and unitary representations and g K cohomology This book will be of interest to mathematicians and statisticians *Representations of Reductive Groups Over Finite Rings and Extended Deligne-Lusztig Varieties* Alexander Stasiński,2004 **Representations of Reductive Groups** Avraham Aizenbud,Dmitry Gourevitch,David Kazhdan,Erez M. these developments He describes the construction of standard tempered representations in terms of square integrable partially harmonic forms on certain real group orbits on a flag variety and outlines the ingredients in the Plancherel formula Finally he describes recent work on the complex geometry of real group orbits on partial flag varieties   **Unipotent Representations of Real Reductive Groups** Lucas David Mason-Brown,2020
