Approaches to Psychology William E. Glassman, Marilyn Hadad, 2004
 This revised and expanded edition of *Approaches to Psychology* builds on the wide appeal of the earlier editions. It explains what the discipline of psychology is, how it developed, and how it contributes to the understanding of human behaviour and experience. This book introduces students to the five major conceptual frameworks or approaches to psychology: biological, behaviourist, cognitive, psychodynamic, and humanistic. The methods, theories, and assumptions of each approach are explored so that the reader builds an understanding of psychology as it applies to human development, social, and abnormal behaviour.

Study Guide Kelly Bouas-Henry, 2005
 By Kelly Bouas-Henry, Missouri Western State College and Douglas A. Bernstein, the *Study Guide* employs numerous techniques to help students learn. Each chapter, including the optional Industrial/Organizational Psychology chapter, contains a detailed outline, a key terms section that presents fresh examples and learning aids, plus a fill-in-the-blank test, learning objectives, a concepts and exercises section that shows students how to apply their knowledge of psychology to everyday issues and concerns, a critical thinking exercise, and personal learning activities. In addition, each chapter concludes with a two-part self-quiz consisting of 40 multiple-choice questions. An answer key tells the student not only which response is correct but also why each of the other choices is wrong, and quiz analysis tables enable students to track patterns to their wrong answers, either by topic or by type of question: definition, comprehension, or application.

The Science of Personality Lawrence A. Pervin, 2003
The Science of Personality, 2e, is an undergraduate text that presents the field of personality as it exists today, rather than the grand theories of personality that have dominated personality texts since the 1960s. Major theories current in the field are discussed in relation to relevant research. Focusing on current research, each chapter begins with an overview, followed by a list of questions devised to stimulate interest and to aid in relating research to broader issues. Boxed inserts feature a researcher whose work is covered in the chapter, along with a personal statement regarding the development, contemporary significance, and future direction of his or her work.
