

Composition

Composition is the arrangement and relationship of elements in a painting or drawing, not unlike arranging the décor in a house. The rules of good composition have evolved through the centuries to the point where today almost anything goes. However, there are still guidelines to follow:

- Use arrows (perspective lines that lead the viewer's eye through the painting) thoughtfully.
- Avoid symmetry.
- Avoid tangents (lines that touch without overlapping).
- Avoid dead ends.
- Avoid placing objects too close together.

Perspective Lines Create Arrows

Use arrows thoughtfully. In drawing (A), three perspective lines form an arrow that slams the eye against the right edge of the drawing. Drawing (B) has a counterbalancing arrow that helps lure the eye down the road.

Avoid Symmetry

The vanishing point in drawing (A) is in the exact center of the paper. This placement makes the arrows created by the perspective lines point to the center and decrease spatial depth. Position your vanishing point asymmetrically, as in drawing (B), for pleasing dynamic tension and greater spatial depth.

Position the Vanishing Point

A vanishing point positioned high in the picture (A) flattens the image, and the viewer is encouraged to look at the larger and most dominant element (the street). Position the vanishing point toward the bottom edge (B) to encourage the viewer to look up toward the sky and to create greater spatial depth.
