

Feminist Perspectives on Argumentation

First published Thu Feb 15, 2021

The noun "argument" and verb "to argue" can describe various things in ordinary language and in different academic disciplines (O'Keefe 1982; Wenzel 1980 [1992]). "Argument" may identify a logical premise-conclusion complex, a speech act, or a dialogical exchange. Arguments may play off other arguments or support each other; smaller arguments can serve as sub-arguments inside larger arguments to which they contribute. Following the practice of

Anglophone philosophers, this entry uses the term "argument" only to indicate a premise-conclusion complex that may involve sub-arguments. "Argumentation" also includes the larger context belonging to the activity of "arguing", understood as the offering of reasons.

Feminist philosophical work on argumentation takes a number of different directions. Some feminists note a general association of arguing with aggression, competition, and masculinity, and they question the necessity of these connections. Also, because many view arguing as a central method of philosophical reasoning, if arguing involves gendered assumptions and standards then that would pose special problems for the discipline. In particular, the goal of winning might get in the way of the other purposes for arguing. So, some feminists ask: Can allegedly "feminine" modes of arguing provide an alternative or supplement to allegedly "masculine" modes? Can overarching epistemological standards account for the benefits of different approaches to arguing? These are some of the prospects for argumentation inside and outside of philosophy that feminists consider.

Some feminists charge, moreover, that the academic study of argumentation—by philosophers and other scholars—has failed to account for the type of reasoning required to provide social justice. Ordinary politeness or even a more robust conception of civility can be inadequate to counteract the influence on argumentation of inequalities based on social identity. What resources can informal logic and interdisciplinary argumentation studies provide to help arguing practices avoid the reinforcement of social injustices? Are informal logic and the study of rhetoric any more helpful than deductive logic? Feminist scholars suggest certain strategies for reasoning and for argument pedagogy, especially looking at ways to address the personal nature that arguing often has.

Other feminists find problems with argumentation standards fairly specific to the discipline of philosophy. It emerges that philosophers often invoke claims about arguments and arguing contrary to accepted argumentation scholarship. Feminists especially note this problem in the way that philosophers employ fallacy labels and how they teach argument in critical thinking courses. Even though argumentation scholarship stands in need of further feminist development, it provides some resources to help philosophy better address social justice concerns.

Schuetz,2006 Wayne Brockriede s contribution to studies of argumentation continues to influence contemporary research **Perspectives on Argumentation** identifies the pertinent theories and contemporary applications on which students can build their own skills of reasoning and can understand the argument practices of others Book jacket Perspectives on Argumentation Wayne Brockriede,Robert Trapp,Janice E. Schuetz,2006 Key title in Rhetoric Argumentation and Debate Series a classic work once again available Explores a variety of perspectives and situations in which teachers and learners can find arguments The book is dedicated to Wayne Brockriede 1922 1985 whose career focused on teaching and learning about argument The essays demonstrate the important role that reasoning plays in personal social philosophical and technical communities The essays that are not published elsewhere also emphasize the great variety of unique places where students can search for and find arguments Perspectives on Argument Nancy Wood,James Miller,2021-06-12 For courses in English Revel tm is Pearson s newest way of delivering our respected content

Fully digital and highly engaging Revel replaces the textbook and gives students everything they need for the course. Informed by extensive research on how people read, think, and learn, Revel is an interactive learning environment that enables students to read, practice, and study in one continuous experience for less than the cost of a traditional textbook. Learn the skill of rational argument. Revel Perspectives on Argument teaches students strategies for critical thinking, critical reading, research, and writing that will help them participate in all types of argument. The 9th Edition extends beyond reading, visual, and multimodal argument into the timely topic of online argument. Students will encounter argument at home, school, and on the job. The authors arm them with the tools they need to identify controversial topics, form opinions, and reactions to text and pictures, and write persuasive papers that express their viewpoints. Perspectives on Argument also follows the premise that not all arguments involve right and wrong. Students will learn skills like finding common ground, consensus, withholding opinions, negotiating, and even changing beliefs when they can no longer make a case for them. Learn more about Revel.

Perspectives on Argument, 2021 [Perspectives on Pragmatics and Philosophy](#) Alessandro Capone, Franco Lo Piparo, Marco Carapezza, 2013-11-26. This book is about the pragmatics of language and it illustrates how pragmatics transcends the boundaries of linguistics. This volume covers Gricean pragmatics as well as topics including conversation and collective belief, the norm of assertion, speech acts, what a context is, the distinction between semantics and pragmatics, and implicature and explicature, pragmatics and epistemology, the pragmatics of belief, quotation, negation, implicature, and argumentation theory, Habermas Universal Pragmatics, Dascal's theory of the dialectical self, theories and theoretical discussions on the nature of pragmatics from a philosophical point of view. Conversational implicatures are generally meaning augmentations on top of explicatures, whilst explicatures figure prominently in what is said. Discussions in this work reveal their characteristics and tensions within current theories relating to explicatures and implicatures. Authors show that explicatures and implicatures are calculable and not directly tied to conventional meaning. Pragmatics has a role to play in dealing with philosophical problems, and this volume presents research that defines boundaries and gives a stable picture of pragmatics and philosophy. World-renowned academic experts in philosophy and pragmalinguistics ask important theoretical questions and interact in a way that can be easily grasped by those from disciplines other than philosophy, such as anthropology, literary theory, and law. A second volume in this series is also available, which covers the perspective of linguists who have been influenced by philosophy.

Argumentation Theory: A Pragma-Dialectical Perspective Frans H. van Eemeren, 2018-07-27. The book offers a compact but comprehensive introductory overview of the crucial components of argumentation theory. In presenting this overview, argumentation is consistently approached from a pragma-dialectical perspective by viewing it pragmatically as a goal-directed communicative activity and dialectically as part of a regulated critical exchange aimed at resolving a difference of opinion. As a result, the book also systematically explains how the constitutive parts of the pragma-dialectical theory of argumentation, which are discussed in a number of separate

publications hang together The following crucial topics are discussed 1 argumentation theory as a discipline 2 the meta theoretical principles of pragma dialectics 3 the model of a critical discussion aimed at resolving a difference of opinion 4 fallacies as violations of a code of conduct for reasonable argumentative discourse 5 descriptive research of argumentative reality 6 analysis as theoretically motivated reconstruction 7 strategic manoeuvring aimed at combining achieving effectiveness with maintaining reasonableness 8 the conventionalization of argumentative practices 9 prototypical argumentative patterns 10 pragma dialectics amidst other approaches Argumentation Theory A Pragma Dialectical Perspective is clearly written and makes argumentation theory understandable to all scholars and advanced students interested in argumentation research *Argumentation: Perspectives and approaches* Frans Hendrik Eemeren,1987
