*Interval Analysis* Günter Mayer, 2017-04-10 This self contained text is a step by step introduction and a complete overview of interval computation and result verification a subject whose importance has steadily increased over the past many years The author an expert in the field gently presents the theory of interval analysis through many examples and exercises and guides the reader from the basics of the theory to current research topics in the mathematics of computation Contents Preliminaries Real intervals Interval vectors interval matrices Expressions P contraction inflation Linear systems of equations Nonlinear systems of equations Eigenvalue problems Automatic differentiation Complex intervals

*The New Enclosures: Critical Perspectives on Corporate Land Deals* Ben White, Saturnino Borrás Jr., Ruth Hall, Ian Scoones, Wendy Wolford, 2013-09-13 This collection explores the complex dynamics of corporate land deals from a broad agrarian political economy perspective with a special focus on the implications for property and labour regimes labour processes and structures of accumulation This involves looking at ways in which existing patterns of rural social differentiation in terms of class gender ethnicity and generation are being shaped by changes in land use and property relations as well as by the re organization of production and exchange as rural communities and resources are incorporated into global commodity chains It goes further than the descriptive what and who questions in order to understand the how and why of these patterns It is empirically solid and theoretically sophisticated making it a robust and boundary changing work Contributors come from various scholarly disciplines Covering nearly all regions of the world the collection will be of interest to researchers from various disciplines

policymakers and activists This book was originally published as a Special Issue of the Journal of Peasant Studies

**Electronic Enclosures, Housings and Packages** Frank Suli, 2018-11-01 Electronic Enclosures Housings and Packages considers the problem of heat management for electronics from an encasement perspective It addresses enclosures and their applications for industrial electronics as well as LED lighting solutions for stationary and mobile markets The book introduces fundamental concepts and defines dimensions of success in electrical enclosures Other chapters discuss environmental considerations shielding standardization materials selection thermal management product design principles manufacturing techniques and sustainability Final chapters focus on business fundamentals by outlining successful technical propositions and potential future directions

**Structures and Architecture. A Viable Urban Perspective?** Marie Frier Hvejsel, Paulo J.S. Cruz, 2022-07-08 Structures and Architecture A Viable Urban Perspective contains extended abstracts of the research papers and prototype submissions presented at the Fifth International Conference on Structures and Architecture ICSA2022 Aalborg Denmark 6-8 July 2022 The book 578 pages also includes a USB with the full texts of the papers 1448 pages The contributions on creative and scientific aspects in the conception and construction of structures as architecture and on the role of advanced digital industrial and craft based technologies in this matter represent a critical blend of scientific technical and practical novelties in both fields Hence as part of the proceedings series Structures and Architecture the volume adds to a continuous exploration and development of the synergetic potentials of the fields of Structures and Architecture With each volume further challenging the conditions problems and potentials related to the art practice and theory of teaching researching designing and building structures as vehicles towards a viable architecture of the urban environment The volumes of the series appear once every three years in tandem with the conferences organized by the International Association of Structures and Architecture and are intended for a global readership of researchers practitioners and students including architects structural and construction engineers builders and building consultants constructors material suppliers planners urban designers anthropologists economists sociologists artists product manufacturers and other professionals involved in the design and realization of architectural structural and infrastructural projects

*Topics in Numerical Analysis* G. Alefeld, Xiaojun Chen, 2001-09-11 This collection of papers on numerical analysis with special emphasis on nonlinear problems covers a broad spectrum of fields Several papers are involved in applying numerical methods for proving the existence of solutions of nonlinear problems e.g. of boundary problems or of obstacle problems Naturally the solution of linear and nonlinear problems by iterative methods is the subject of a couple of papers Here topics like the fast verification of solutions of monotone matrix equations the convergence of linear asynchronous iteration with spectral radius of modulus one or aggregation and disaggregation methods for p cyclic Markov chains are treated On the other hand papers involved in optimization problems can be found Nearly all fields of modern numerical analysis are touched by at least one paper

*Mathematical Reviews*, 2006 [Tactical Approaches to Technical](#)

Communication Hayley McCullough, Hilary A. Sarat-St. Peter, Miles A. Kimball, 2025-06-01 Delves into how individuals tactically exist within communicative systems carving out spaces for themselves in places they don't necessarily fit In 1984 Michel de Certeau described the terms strategies as how institutions communicate their wants demands desires and tactics as how individuals navigate these potentially hostile unwelcoming systems A little over two decades later Miles A Kimball solidified the idea of tactical technical communication laying the foundations for a new area of inquiry and scholarship Today many academics and researchers have imbued the concept of tactical technical communication with their own ideas and perspectives This essay collection spotlights a meaningful diversity of tactical technical communication scholarship exploring topics like the feminist punk magazine BIKINI KILL the phenomenon of copwatching the usage of fictional narratives in technical writing courses and the challenges of LBGTQ visibility in local libraries In many ways the contributors are partaking in their own forms of tactical communication as they carve out spaces for themselves and their ideas within the academic discourse

**Military Education** Cynthia A. Watson, 2007-02-28 Professional Military Education PME is broader and more rigorous than is widely understood in the United States Improving educational programs within the military service branches is at the very center of ongoing force transformation efforts and advanced educational opportunities occur at various set levels of military experience Military education increasingly conforms to standards imposed by outside civilian accrediting bodies and is mandated and monitored to an extent by Congress Military Education explores this often overlooked area of education within the context of the modern military force structure In this unique work Watson chronicles the evolution of professional military education during the last sixty years Careful to draw distinctions between training and education she briefly traces the history of PME and examines some of the major personalities involved in shaping it as well as the evolution of the curriculum stressed in PME programs Her narrative combined with key documents a glossary and a timeline of important events dispels popular notions of an uneducated military force

**The British Industrial Revolution in Global Perspective** Robert C. Allen, 2009-04-09 Why did the industrial revolution take place in eighteenth century Britain and not elsewhere in Europe or Asia In this convincing new account Robert Allen argues that the British industrial revolution was a successful response to the global economy of the seventeenth and eighteenth centuries He shows that in Britain wages were high and capital and energy cheap in comparison to other countries in Europe and Asia As a result the breakthrough technologies of the industrial revolution the steam engine the cotton mill and the substitution of coal for wood in metal production were uniquely profitable to invent and use in Britain The high wage economy of pre industrial Britain also fostered industrial development since more people could afford schooling and apprenticeships It was only when British

engineers made these new technologies more cost effective during the nineteenth century that the industrial revolution would spread around the world
