The Decline and Fall of Practically Everyone Victor G. Novander Jr., 2006-03-07 The Decline and Fall of Practically Everyone is a concise history of humanity It is written from the point of view of someone whose outlook on life has been transformed by primal therapy and who has become a lifelong primal person No other history has been written from this unique perspective The Decline and Fall of Practically Everyone offers to each one who is ready for it a fresh glimpse into his own history and into a sound understanding of the course all human history has taken toward the devolution of original human consciousness into unconscious self awareness In Part I the author defines consciousness unconscious self awareness primal pain priming and what living a primal life involves He pictures the primal life as putting ones feet on the path toward greater consciousness The authors stated purpose is to wake us up to our condition of unconscious self awareness He feels that unless we are awakened humanity will continue to careen toward destroying itself and the life sustaining nurture of Earth The authors approach to the necessary awakening is historical If one can see history through primal eyes one will not only see the devolution of consciousness into unconscious self awareness down through the millennia one will sense it in ones own life and do something about it Then in Part II he explores various attributes of unconscious self awareness that are relevant to a primal understanding of history These subjects include the basic split the point at which unconscious self awareness completely suppresses consciousness the location and upward movement of unconscious self awareness in the body the experience of time and space the changing nature of the supreme deity and the four motifs of religion In Part III the author begins to explore the historical devolution of original consciousness into unconscious self awareness Subjects revealing the devolution include beliefs regarding the origin of the cosmos and of humanity the destiny of the dead shamanism the several millennia long invasions by Warrior God societies of Mother Goddess cultures and the revolutionary religions of Buddhism and Christianity In the authors view everything that has happened since the 1st millennium B C E is but a footnote to it and he therefore skips to the Americas in the 15th century In Part IV the author concentrates on greed and lust for power as the chief characteristics of unconscious self awareness in the modern period He begins with Columbus and the euphemistically named Age of Exploration to illustrate how greed and the lust for power dominated the Western European Colonial powers Next he shows how the Age of Enlightenment and its major philosophers and economists provided the basis for our Founding Fathers to craft a constitution that enshrined themselves as a rich and powerful elite ruling class To illustrate the greed and lust for power of unconscious self awareness in the rest of U S history he discusses economics individualism class and class struggle differences among people and between men and women in the

degree of unconscious self awareness family parenting models unilateralism as the national expression of individualism and the U S as a nation dominated by greed by a lust for power by a quest for world domination and by the willingness to use violence and terror to achieve these ends In the final chapter the author reiterates his purpose of awakening his readers from the state of unconscious self awareness In contrast to a strictly psychological approach to fulfill his purpose the author has adopted in addition a perspective that encompasses the whole sweep of human history He ends by offering a cautious optimism for the future

Hunter Gatherers Body Rediscover the pleasure of touch Rethink footwear to cure foot and back pain learn correct posture and biomechanics maybe for the first time ever Nature Relieve stress at the biochemical level simply by immersing yourself in pleasant natural surroundings anywhere even if you are city bound Daily Rhythm Prioritize healthful sleep habits wholesome diversions solitary downtime and limit technology to remain focused creative and productive Social Withstand the pull of instant gratifications and narrow your social circle to honor real life friends over Facebook Build a supportive and nurturing tribe Play Rediscover your innate cravings for daily doses of spontaneous physical fun Finally understand the true meanings of pleasure and leisure The Primal Connection allows you to have it all you ll honor your ancient genetic recipe for health while still enjoying the comfort and convenience of modern life Q A with Mark 1 How does this book differ from The Primal Blueprint The Primal Blueprint focused on the ten lifestyle laws of our hunter gatherer ancestors with particular emphasis on what seem to be the most urgent and obvious life changing elements of the Evolutionary Health movement eating primal foods and exercising in a manner aligned with optimal gene expression The Primal Connection extends the primal theme to matters of the psyche and the disconnects inherent with high tech modern life and how to fix things 2 What are the overarching themes of The Primal Connection You ll embrace three critical themes that will help you withstand the destructive forces of modern life First your genes expect certain inputs to make you healthy strong and happy If you create a different experience slamming junk food or blasting artificial light and digital stimulation after dark you ll compromise long term health period Your genes don t know or care whether the inputs they receive are health promoting or health compromising they are simply programmed to fight for homeostasis at all times Drink a soda and your genes respond by prompting the release of insulin to regulate blood sugar levels In this refrain the development of type 2 diabetes from prolonged excessive insulin production and the subsequent resistance of cells to respond to insulin is not a genetic defect but an example of gene expression at work Your genes will fight valiantly to moderate the wildly excessive intake of carbohydrates in the Standard American Diet by producing insulin until this genetic mechanism becomes utterly exhausted and a diabetic condition develops The second theme is that abundance and scarcity are often mismatched with our genetic expectations For example our ancestors had abundant leisure time and scarce material possessions This is something our brains are still wired to expect and appreciate but the exact opposite often plays out today *Religion and Mythology* Louis Hammann,1998-06-11 Argues that throughout the histories of culture religion and myth have always been tightly bonded and always are by necessity Considers whether the time has come to redefine religion mythmaking as a habit of mind history imagined as truth mythologies as alternative visions and surrogate myths No index Annotation copyrighted by Book News Inc Portland OR [Humor in the House](#) Katrina Kathleen Schimmoeller,1998 *Gargoyle Magazine* Richard Peabody,1985
