  Self-Organizing Neural Networks Udo Seiffert,2014-09-01   Self-Organizing Neural Networks Udo Seiffert,2001-09-25 The Self Organizing Map SOM is one of the most frequently used architectures for unsupervised artificial neural networks Introduced by Teuvo Kohonen in the 1980s SOMs have been developed as a very powerful method for visualization and unsupervised classification tasks by an active and innovative community of interna tional researchers A number of extensions and modifications have been developed during the last two decades The reason is surely not that the original algorithm was imperfect or inad equate It is rather the universal applicability and easy handling of the SOM Com pared to many other network paradigms only a few parameters need to be arranged and thus also for a beginner the network leads to useful and reliable results Never theless there is scope for improvements and sophisticated new developments as this book impressively demonstrates The number of published applications utilizing the SOM appears to be unending As the title of this book indicates the reader will benefit from some of the latest the oretical developments and will become acquainted with a number of challenging real world applications Our aim in producing this book has been to provide an up to date treatment of the field of self organizing neural networks which will be ac cessible to researchers practitioners and graduated students from diverse disciplines in academics and industry We are very grateful to the father of the SOMs Professor Teuvo Kohonen for sup porting this book and contributing the first chapter   DIE ARCHITEKTURTYPEN DES "SELF-ORGANIZING (FEATURE) MAP (SO(F)M)" NACH TEUVO KOHONEN Harald Maurer,2009 Das Buch stellt eine leicht berarbeitete Fassung meiner Studienarbeit dar die ich im Fachbereich Informatik bei Prof Dr M Bogdan im Wintersemester 2003 04 und im Sommersemester 2004 geschrieben habe Es gibt erstmals einen umfassenden berblick ber die wichtigsten Architekturtypen der Selbstorganisierende Merkmals Karte engl Self Organizing Feature Map SO F M des finnischen Ingenieurs Teuvo Kohonen auch Kohonen Karte genannt die eine der bedeutendsten Modelle im Rahmen der Theorie der k nstlichen Neuronalen Netzwerke darstellt Es werden dabei die relevantesten Passagen aus den wichtigsten Artikeln der jeweiligen Autoren zitiert die die zentralen Konzepte der diversen Architekturmodelle wiedergeben und dann zusammengefa t und kommentiert   *Biologically Inspired Approaches to Advanced Information Technology* Auke Jan Ijspeert,Masayuki Murata,Naoki Wakamiya,2004-10-22 The evolution of the Internet has led us to the new era of the information infrastructure As the information systems operating on the Internet are getting larger and more complicated it is clear that the traditional approaches based on centralized mechanisms are no longer meaningful One typical example can be found in the recent growing interest in a P2P peer to peer computing paradigm It is quite different from the Web based client server systems which adopt essentially centralized management mechanisms The P2P computing environment has the potential to overcome bottlenecks in Web computing paradigm but it introduces another difficulty a scalability problem in terms of information found if we use a brute force flooding mechanism As such conventional information systems have been designed in a

centralized fashion As the Internet is deployed on a world scale however the information systems have been growing and it becomes more and more difficult to ensure fau free operation This has long been a fundamental research topic in the field A complex information system is becoming more than we can manage For these reasons there has recently been a significant increase in interest in biologically inspired approaches to designing future information systems that can be managed efficiently and correctly   New Materials in Civil Engineering Pijush Samui,Dookie Kim,Nagesh R. Iyer,Sandeep Chaudhary,2020-07-07 New Materials in Civil Engineering provides engineers and scientists with the tools and methods needed to meet the challenge of designing and constructing more resilient and sustainable infrastructures This book is a valuable guide to the properties selection criteria products applications lifecycle and recyclability of advanced materials It presents an A to Z approach to all types of materials highlighting their key performance properties principal characteristics and applications Traditional materials covered include concrete soil steel timber fly ash geosynthetic fiber reinforced concrete smart materials carbon fiber and reinforced polymers In addition the book covers nanotechnology and biotechnology in the development of new materials Covers a variety of materials including fly ash geosynthetic fiber reinforced concrete smart materials carbon fiber reinforced polymer and waste materials Provides a one stop resource of information for the latest materials and practical applications Includes a variety of different use case studies   *Progress in Pattern Recognition, Image Analysis and Applications* José Francisco Martínez-Trinidad,2006-10-12 This book constitutes the refereed proceedings of the 11th Iberoamerican Congress on Pattern Recognition CIARP 2006 held in Cancun Mexico in November 2006 The 99 revised full papers presented together with three keynote articles were carefully reviewed and selected from 239 submissions The papers cover ongoing research and mathematical methods   Neural Computation ,2002   Operations Research Proceedings ,2004   Recent Advances in Sensors, Radiometry, and Data Processing for Remote Sensing Philip N. Slater,1988   **Self-Organizing Maps** Teuvo Kohonen,2012-12-06 The second revised edition of this book was suggested by the impressive sales of the first edition Fortunately this enabled us to incorporate new important results that had just been obtained The ASSOM Adaptive Subspace SOM is a new architecture in which invariant feature detectors emerge in an unsupervised learning process Its basic principle was already introduced in the first edition but the motiva tion and theoretical discussion in the second edition is more thorough and consequent New material has been added to Sect 5 9 and this section has been rewritten totally Correspondingly Sect 1 4 which deals with adaptive subspace classifiers in general and constitutes the prerequisite for the ASSOM principle has also been extended and rewritten totally Another new SOM development is the WEBSOM a two layer architecture intended for the organization of very large collections of full text documents such as those found in the Internet and World Wide Web This architecture was published after the first edition came out The idea and results seemed to be so important that the new Sect 7 8 has now been added to the second edition Another addition that contains new results is Sect 3 15 which describes the acceleration in the computing of very large SOMs
