## 10+ Fun Facts About The Rainforest!

A rainforest is an area of tall, mostly evergreen trees and a high amount of rainfall. Rainforests are Earth's oldest living ecosystems, with some surviving in their present form for at least 70 million years.

While tropical rainforests are the most famous, there are different types of rainforest: the Pacific Northwest in the United States has dense forests that receive as much rainfall as parts of the Amazon.

Tropical forests cover at least 2.5 percent of the Earth's surface area.

The Amazon basin contains the world's largest rainforest, which is nearly the area of the continental United States and covers about 40 percent of South American countries.

The second largest rainforest is found in Central Africa's Congo Basin.
