

OPTIMIZING HEALTH AND LONGEVITY

HOW TO OVERCOME YOUR PRIMITIVE DNA

In his successful effort to avoid triple by-pass open-heart surgery, an engineer uncovers answers for these critical 21st Century health questions:

- Why are foods that taste so good suddenly so bad for us?
- Why are many enzymes and hormones declining after 25 years of age?
- Why are girls becoming sexually mature as early as eight years of age?
- Why has obesity become epidemic among our younger children as well as all other age groups?
- Have the changes of the 20th century corrupted the DNA that once insured our survival for so many millennia?

It's time to make vital choices: A lifestyle that features an improved diet, efficient exercise, and meditation to handle stress, anger and guidance, can add years to your life and even more to your children's lives.
