

Modest Proposals for a Lunar Base After 2024

Woohyun Kang

Research Question

What is an appropriate framework for a sustainable lunar base that is cost-conscious, ensures mission success, and holds 100 researchers to survive and study the Moon?

Abstract

As humanity's natural inclination to explore pushes society to advance, the National Aeronautics and Space Administration(NASA) plans to land humans back on the Moon in 2024 [1]. A research base situated on the Moon will bring humanity into a new phase of interplanetary civilization. Such a project will generate new frontiers for exploration, economic opportunities, and inspire a new generation of scientifically minded people [1]. A lunar base is proposed for construction after the completion of the Artemis III mission. Vital components required for supporting 100 permanent residents on the Moon include residence, transportation, satellites, and agriculture infrastructure. The south pole of the Moon is the location considered for this lunar base. The Foundational Surface Habitat (FSH), Lunar Terrain Vehicle (LTV), Habitable Mobility Platform (HMB), solar sail satellites, and the Gateway space station are main lunar technologies that will be used in the lunar base after 2024 [2, 3]. In the lunar base, the atmosphere composition of a pressurized residence facility must be oxygen/nitrogen based on abundance and cost. Nitrogen is best sourced from Earth through nitrogen generators due to its absence on the Moon, and oxygen is best sourced from cold ice traps on the south pole. Depending on the area of ice considered, the available amount for breathing varies from 240 years' worth to 3.9 millions years' worth of oxygen. The astronauts would receive food to meet a daily caloric requirement calculated per person based on biological measurements, and the World Health Organization (WHO) provides accurate mineral and vitamin intake information [4, 5]. The average required nutrients in calories for astronauts per male per day is 2968 kcal and per female per day is 2465.75 kcal. The base provides equipment and space such that astronauts can exercise at least 2 hours a day to counteract the weak gravity of the moon. Agriculture would employ hydroponics and aeroponics. Spinach, leek, and peas are recommended crops due to their high amounts of vital nutrients such as protein [6].

If Babel Had a Form Tze-Yin Teo, 2022-04-05 The likeness of form between Chinese and English sentences writes the American Sinologist Ernest Fenollosa around 1906 renders translation from one to the other exceptionally easy If Babel Had a Form asks not if his claim may be true but what its phantasmic surprise may yet do In twentieth century intersections of China and Asia with the United States translations did more than communicate meaning across politicized and racializing differences of language and nation Transpacific translation breached the regulative protocols that created those very differences of human value and cultural meaning The result Tze Yin Teo argues saw translators cleaving to the sounds and shapes of poetry to imagine a translingual likeness of form but not of meaning or kind At stake in this form without meaning is a startling new task of equivalence As a concept equivalence has been rejected for its colonizing epistemology of value naming a broken promise of translation and false premise of comparison Yet the writers studied in this book veered from those ways of knowing to theorize a poetic equivalence negating the colonial foundations of the concept they ignited aporias of meaning into flashpoints for a radical literary translation The book's transpacific readings glean those forms of equivalence from the writing of Fenollosa the vernacular experiments of Boxer Scholar Hu Shi the trilingual musings of Shanghai born Los Angeles novelist Eileen Chang the minor work of the Bay Area Korean American transmedial artist Theresa Cha and a post Tiananmen elegy by the exiled dissident Yang Lian The conclusion returns to the deconstructive genealogy of recent debates on translation and untranslatability displacing the axiom of radical alterity for a no less radical equivalence that remains pace Fenollosa far from easy or exceptional Ultimately If Babel Had a Form illuminates the demanding force of even the slightest sameness entangled in the translator's work of remaking our differences
