Mathematical Bridge, A: An Intuitive Journey In Higher Mathematics (2nd Edition) Stephen Fletcher Hewson, 2009-01-20 Although higher mathematics is beautiful natural and interconnected to the uninitiated it can feel like an arbitrary mass of disconnected technical definitions symbols theorems and methods An intellectual gulf needs to be crossed before a true deep appreciation of mathematics can develop This book bridges this mathematical gap It focuses on the process of discovery as much as the content leading the reader to a clear intuitive understanding of how and why mathematics exists in the way it does The narrative does not evolve along traditional subject lines each topic develops from its simplest intuitive starting point complexity develops naturally via questions and extensions Throughout the book includes levels of explanation discussion and passion rarely seen in traditional textbooks The choice of material is similarly rich ranging from number theory and the nature of mathematical thought to quantum mechanics and the history of mathematics It rounds off with a selection of thought provoking and stimulating exercises for the reader *Books in Print* ,1991

L. Naber, Sheung Tsun Tsou, 2006 The Encyclopedia of Mathematical Physics provides a complete resource for researchers, students and lecturers with an interest in mathematical physics. It enables readers to access basic information on topics peripheral to their own areas, to provide a repository of the core information in the area that can be used to refresh the researcher's own memory banks and aid teachers in directing students to entries relevant to their course work. The Encyclopedia does contain information that has been distilled, organised and presented as a complete reference tool to the user and a landmark to the body of knowledge that has accumulated in this domain. It also is a stimulus for new researchers working in mathematical physics or in areas using the methods originating from work in mathematical physics by providing them with focused, high quality background information. Editorial Board: Jean Pierre Francoise, Universit Pierre et Marie Curie, Paris, France; Gregory L. Naber, Drexel University, Philadelphia, PA, USA; Tsou Sheung Tsun, University of Oxford, UK. Also available online via ScienceDirect, 2006, featuring extensive browsing, searching and internal cross referencing between articles in the work, plus dynamic linking to journal articles and abstract databases, making navigation flexible and easy.
