Techniques in Molecular Systematics and Evolution Rob DeSalle, Gonzalo Giribet, Ward Wheeler, 2002-04-01 The amount of information that can be obtained by using molecular techniques in evolution systematics and ecology has increased exponentially over the last ten years The need for more rapid and efficient methods of data acquisition and analysis is growing accordingly This manual presents some of the most important techniques for data acquisition developed over the last years The choice and justification of data analysis techniques is also an important and critical aspect of modern phylogenetic and evolutionary analysis and so a considerable part of this volume addresses this important subject The book is mainly written for students and researchers from evolutionary biology in search for methods to acquire data but also from molecular biology who might be looking for information on how data are analyzed in an evolutionary context To aid the user information on web located sites is included wherever possible Approaches that will push the amount of information which systematics will gather in the

Plant Molecular Systematics Daniel J. Crawford, 1990-04-24. Describes how the primary chemicals, protein, DNA, and RNA found in plants are used in determining plant taxonomic and evolutionary relationships. A growing area reflecting the application of molecular biological techniques in macromolecular systematic research. Topics include: seed protein electrophoresis, electrophoretic studies of Rubisco enzyme, electrophoresis, amino acid sequencing, and systematic serology. Emphasizes evaluation of the systematic potential of the various kinds of data made available by new technology. Includes case studies and discussion of trends and directions in molecular systematics.

Molecular Systematics of Bryophytes Bernard Goffinet, Victoria Catherine Hollowell, Robert E. Magill, 2004. Molecular Systematics of Bryophytes: Progress, Problems, and Perspectives was an internationally attended symposium held at the Missouri Botanical Garden, September 6 and 7, 2003. Attendees from a dozen countries representing a global bryological community participated in the event. The symposium program featured twenty-nine speakers discussing various aspects of the molecular systematics of bryophytes: mosses, liverworts, and hornworts. The result of this gathering of eminent botanical researchers is the book now before you: twenty-one chapters divided into five areas of concentration: 1. Bryophytes and Evolution of Land Plants; 2. Hornwort Phylogeny; 3. Liverwort Phylogeny; 4. Moss Phylogeny; and 5. Phylogeography.
