## **Observations On America:**

**America To-Day, Observations and Reflections** William Archer, 2012-04-23 The Atlantic Ocean is geographically a misnomer socially and politically a dwindling superstition That is the chief lesson one learns and one has barely time to take it in between Queenstown and Sandy Hook Ocean forsooth this little belt of blue water that we cross before we know where we are at a single hop skip and jump From north to south perhaps it may still count as an ocean from east to west we have narrowed it into a strait Why even for the seasick and on this point I speak with melancholy authority the Atlantic has not half the terrors of the Straits of Dover comfort at sea being a question not of the size of the waves but of the proportion between the size of the waves and the size of the ship Our imagination is still beguiled by the fuss the world made over Columbus whose exploit was intellectually and morally rather than physically great The map makers too throw dust in our eyes by their absurd figment of two hemispheres as though Nature had sliced her orange in two and held one half in either hand We are slow to realise in fact that time is the only true measure of space and that London to day is nearer to New York than it was to Edinburgh a hundred and fifty years ago The essential facts of the case as they at present stand would come home much more closely to the popular mind of both continents if we called this strip of sea the Straits of New York and classed our liners not as the successors of Columbus s caravels but simply as what they are giant ferry boats plying with clockwork punctuality between the twin landing stages of the English speaking world **America To-day** William Archer, 1900 Researches Carnegie Institution of Washington. Department of Terrestrial Magnetism, 1912 **America's First Eclipse Chasers** Thomas Hockey, 2023-05-27 In 2017 over 200 million Americans witnessed the spectacular total eclipse of the Sun and the 2024 eclipse is expected to draw even larger crowds In anticipation of this upcoming event this book takes us back in history over 150 years telling the story of the nation s first ever eclipse chasers Our tale follows the chaotic journeys of scientists and amateur astronomers as they trekked across the western United States to view the rare phenomenon of a total solar eclipse The fascinating story centers on the expeditions of the 1869 total eclipse which took place during the turbulent age of the chimerical Planet Vulcan and Civil War Reconstruction The protagonists a motley crew featuring astronomical giants like Simon Newcomb and pioneering female astronomers like Maria Mitchell were met with unanticipated dangers mission threatening accidents and eccentric characters only the West could produce Theirs is a story of astronomical proportions Along the way we will make several stops across the booming US railroad network traveling from viewing sites as familiar as Des Moines Iowa to ones as distant and strange as newly acquired Alaska From equipment failures and botched preparations to quicksand and apocalyptic comets welcome to the wild western world of solar eclipses **Catalogue of the Public Library of Cincinnati** Anonymous, 2025-11-29 Reprint of the original first published in 1871 The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage America Today William
