Synthesis of Science Religion and Philosophy a book originally published as two volumes in 1888 is Helena Blavatsky's magnum opus. It was an influential example of the revival of interest in esoteric and occult ideas in the modern age in particular because of its claim to reconcile ancient eastern wisdom with modern science. The book purports to explain the origin and evolution of the universe itself. Helena Petrovna Blavatsky (1831-1891) was a Russian occultist, spirit medium, and author who co-founded the Theosophical Society in 1875. She gained an international following as the leading theoretician of Theosophy, the esoteric religion that the society promoted.

The Secret Doctrine: Anthropogenesis Helena Petrovna Blavatsky, 1897 *The Secret Doctrine Volume One* Helena Petrovna Blavatsky, 2020-02-17

The Secret Doctrine: the Synthesis of Science Religion and Philosophy a book originally published as two volumes in 1888 written by Helena Blavatsky. The first volume is named Cosmogogenesis, the second Anthropogenesis. It was an influential example of the revival of interest in esoteric and occult ideas in the modern age in particular because of its claim to reconcile ancient eastern wisdom with modern science. Blavatsky claimed that its contents had been revealed to her by mahatmas who had retained knowledge of humanity's spiritual history, knowledge that it was now possible in part to reveal.

Volume one Cosmogogenesis. In Volume One Blavatsky details her interpretation of the origin and evolution of the universe itself in terms derived from the Hindu concept of cyclical development. The world and everything in it is said to alternate between periods of activity (manvantaras) and periods of passivity (pralayas). Each manvantara lasts many millions of years and consists of a number of Yugas in accordance with Hindu cosmology. Blavatsky attempted to demonstrate that the discoveries of materialist science had been anticipated in the writings of ancient sages and that materialism would be proven wrong.

God, Science & the Secret Doctrine: The Zero Point Metaphysics & Holographic Space of H. P. Blavatsky Christopher P. Holmes, 2010-09

Deity is in every point of the universe. H. P. Blavatsky, S. D. 1888, p. 114. The Secret teachings must be contrasted with the speculations of modern science. To make of Science an integral whole necessitates indeed the study of spiritual and psychic as well as physical Nature. Without metaphysics, real science is inadmissible. H. P. Blavatsky's *The Secret Doctrine* was published in 1888 and is relatively unknown in modern times. As it happens in this strange universe, Madame Blavatsky anticipated numerous modern concepts concerning the creation of the Universe and the mechanisms of the laws of nature, including the holographic paradigm in psychology and physics. Blavatsky articulated the concept of the zero point or singularity origin of the Cosmos and of the Sons

and a profound alternative view of the nature of the Aether and higher Space dimensions Blavatsky states material points without extension zero points are the materials out of which the Gods and other invisible powers clothe themselves in bodies the entire universe concentrating itself as it were in a single point Dr Holmes has grasped the profound meaning of this claim and related this ancient mystical teaching to the newest ideas in physics and science as well as to explorations of human consciousness God Science The Secret Doctrine raises the ultimate question of the existence or non existence of God and what we mean by this term
