## Module Categories Of Analytic Groups:

*Module Categories of Analytic Groups* Andy R. Magid, 1982-06-03 Professor Magid has written a complete account of the subject that is accessible to a wide audience

*Differential Tensor Algebras and Their Module Categories* R. Bautista, L. Salmerón, R. Zuazua, 2009-09-17 A detailed account of main results in the theory of differential tensor algebras

**Abelian Groups, Module Theory, and Topology** Dikran Dikranjan, 2019-05-16 Features a stimulating selection of papers on abelian groups commutative and noncommutative rings and their modules and topological groups Investigates currently popular topics such as Butler groups and almost completely decomposable groups

**Rigid Character Groups, Lubin-Tate Theory, and  $(\varphi, \Gamma)$ -Modules** Laurent Berger, Peter Schneider, Bingyong Xie, 2020-04-03 The construction of the  $p$  adic local Langlands correspondence for  $GL_2 \mathbb{Q}_p$  uses in an essential way Fontaine's theory of cyclotomic modules Here cyclotomic means that  $\text{Gal}(\mathbb{Q}_p(\mu_p)/\mathbb{Q}_p)$  is the Galois group of the cyclotomic extension of  $\mathbb{Q}_p$  In order to generalize the  $p$  adic local Langlands correspondence to  $GL_2 L$  where  $L$  is a finite extension of  $\mathbb{Q}_p$  it seems necessary to have at our disposal a theory of Lubin Tate modules Such a generalization has been carried out to some extent by working over the  $p$  adic open unit disk endowed with the action of the endomorphisms of a Lubin Tate group The main idea of this article is to carry out a Lubin Tate generalization of the theory of cyclotomic modules in a different fashion Instead of the  $p$  adic open unit disk the authors work over a character variety that parameterizes the locally  $L$  analytic characters on  $\mathfrak{o}_L$  They study modules in this setting and relate some of them to what was known previously

**Rings, Modules, Algebras, and Abelian Groups** Alberto Facchini, Evan Houston, Luigi Salce, 2020-02-10 Rings Modules Algebras and Abelian Groups summarizes the proceedings of a recent algebraic conference held at Venice International University in Italy Surveying the most influential developments in the field this reference reviews the latest research on Abelian groups algebras and their representations module and ring theory and topological

**Abelian Groups and Modules** K.M. Rangaswamy, David Arnold, 1996-08-16 Contains the proceedings of an international conference on abelian groups and modules held recently in Colorado Springs Presents the latest developments in abelian groups that have facilitated cross fertilization of new techniques from diverse areas such as the representation theory of posets model theory set theory and module theory

*New Horizons in pro- $p$  Groups* Marcus du Sautoy, Dan Segal, Aner Shalev, 2000-05-25 A pro  $p$  group is the inverse limit of some system of finite  $p$  groups that is of groups of prime power order where the prime conventionally denoted  $p$  is fixed Thus from one point of view to study a pro  $p$  group is the same as studying an infinite family of finite groups but a pro  $p$  group is also a compact topological group and the compactness works its usual magic to bring infinite problems down to manageable proportions The  $p$  adic integers appeared about a century ago but the systematic study of pro  $p$  groups in general is a fairly recent development Although much has been discovered many avenues remain to be explored the purpose of this book is to present a coherent account of the considerable achievements of the last several years and to point the way forward Thus our aim is both to stimulate research

and to provide the comprehensive background on which that research must be based The chapters cover a wide range In order to ensure the most authoritative account we have arranged for each chapter to be written by a leading contributor or contributors to the topic in question Pro p groups appear in several different though sometimes overlapping contexts
