Nonexistent Objects:

Nonexistent Objects in Buddhist Philosophy Zhihua Yao, 2020-01-23 Can we know what there is not This book examines the historical development of the concept of the cognition of nonexistent objects in several major Buddhist philosophical schools Beginning with a study of the historical development of the concept in Mahasamghika Darstantika Yogacara and Sautrantika it evaluates how successfully they have argued against the extreme view of their main opponent the Sarvastivadins and established their view that one can know what there is not It also includes thematic studies on the epistemological issues of nonexistence discussing making sense of empty terms controversies over negative judgments and a proper classification of the conceptions of nothing or nonexistence Taking a comparative approach to these topics this book considers contemporary Western philosophers such as Husserl Heidegger Meinong and Russell alongside representative figures of the Buddhist Pramana School Based on first hand study of primary sources in Sanskrit Chinese and Tibetan **Nonexistent Objects in Buddhist Philosophy** makes available the rich discussions and debates on the epistemological issues of nonexistence in Buddhist philosophy to students and researchers in Asian and comparative philosophy

Nonexistent Objects K.J. Perszyk, 2013-03-09 Issues surrounding the status and nature of nonexistent objects constitute one of philosophy's oldest and densest thickets In this book Perszyk takes his readers surefootedly through this thicket informed both historically and at the level of contemporary discussion of relevant themes His main aim is to develop a bundle or set of properties interpretation of Meinong's theory of nonexistent objects as opposed to a set of properties neo Meinongian metaphysics and to defend this nonstandard interpretation against competing views in both the philosophical and scholarly literature on Meinong The Meinong who emerges is neither the hero nor the villain his friends and foes have commonly led us to believe This clearly written book is a valuable addition both to the literature on Meinong and to contemporary metaphysics of modality It is written for students and professionals interested in these and related areas

Fictional Objects Stuart Brock, Anthony Everett, 2015 Discusses a range of philosophical questions about fictional characters and fictional objects with implications for metaphysics the philosophy of mind and the philosophy of language

Nothingness in Asian Philosophy Jeeloo Liu, Douglas Berger, 2014-06-13 A variety of crucial and still most relevant ideas about nothingness or emptiness have gained profound philosophical prominence in the history and development of a number of South and East Asian traditions including in Buddhism Daoism Neo Confucianism Hinduism Korean philosophy and the Japanese Kyoto School These traditions share the insight that in order to explain both the great mysteries and mundane facts about our experience ideas of nothingness must play a primary role This collection of essays brings together the work of twenty of the world's prominent scholars of Hindu Buddhist Daoist Neo Confucian Japanese and Korean thought to illuminate fascinating philosophical conceptualizations of nothingness in both classical and modern Asian traditions The unique collection offers new work from accomplished scholars and provides a coherent panoramic view of the most significant ways that nothingness

plays crucial roles in Asian philosophy It includes both traditional and contemporary formulations sometimes putting Asian traditions into dialogue with one another and sometimes with classical and modern Western thought The result is a book of immense value for students and researchers in Asian and comparative philosophy Chapter 20 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Nonexistent Objects Professor of Philosophy & Linguistics Terence Parsons, Terence Parsons, 1980 In this book Terence Parsons revives the older tradition of taking such objects at face value Using various modern techniques from logic and the philosophy of language he formulates a metaphysical theory of nonexistent objects The theory is given a formalization in symbolism rich enough to contain definite descriptions modal operators and epistemic contexts and the book includes a discussion which relates the formalized theory explicitly to English
