

## Exterior Load Bearing Wall

**Header**

Transfers weight from above the window to the jack studs and ultimately the foundation wall.

**Jack stud/Trimmer**

Short studs placed around openings in the framing to carry the weight from the header to the foundation wall.

**King Stud**

Full-length studs that reinforce the window (opening) framing, and carry the weight from above to the foundation wall.

**Cripple stud**

Cripple studs above the header are load-bearing, and below the window, they maintain stud spacing for drywall.

*The number of jack and king studs required, as well as the size of the header, are prescribed in the code based on the opening size and planned load.*
