Picturing Time:

Picturing Time Marta Braun, 1992 A complete illustrated survey of Etienne Jules Marey's work that investigates the far-reaching effects of her inventions on stream of consciousness literature psychoanalysis Bergsonian philosophy and the art of cubists and futurists [Picturingtime](#) Marta Braun, 1992 **Marta Braun. Picturing time: the work of Etienne Marey. [Review]. The moment as it flies. University of Chicago Press** Mark Haworth-Booth, 1993 [The Nineteenth-century Visual Culture Reader](#) Vanessa R. Schwartz, Jeannene M. Przyblyski, 2004 This Reader brings together for the first time key writings about the nineteenth century a key period in contemporary discussion of visual culture Exploring such topics as photographs exhibitions and advertising the editors suggest that modernity rather than modernism is a valuable way of understanding the changes particular to the visual culture of the time and they investigate a variety of nineteenth century images technologies and visual experiences With three specially written essays about definitions of visual culture as an object of study the book examines genealogies and introduces key writings about culture from writers living in the nineteenth century itself or from those who scrutinized its visual culture from early in the twentieth century such as Walter Benjamin and Siegfried Kracauer The Nineteenth Century Visual Culture Reader is organized around key themes technologies of vision practices of display and the circulation of images cities and the built environment visual representations of the past visual representations of categories of racial sexual and social differences spatial configurations of inside and out private and public Selections include well known authors and new research by younger scholars to produce a well balanced and comprehensive collection **From Photography to fMRI** Paula Muhr, 2022-09-01 Hysteria a mysterious disease known since antiquity is said to have ceased to exist Challenging this commonly held view this is the first cross disciplinary study to examine the current functional neuroimaging research into hysteria and compare it to the nineteenth century image based research into the same disorder Paula Muhr's central argument is that both in the nineteenth century and the current neurobiological research on hysteria images have enabled researchers to generate new medical insights Through detailed case studies Muhr traces how different images from photography to functional brain scans have reshaped the historically situated medical understanding of this disorder that defies the mind body dualism *Industry, Liberty, and a Vision* Stephen Herbert, 1998 *Mapping the Moving Image* Pasi Väliäho, 2010 In *Mapping the Moving Image* Pasi Väliäho offers a compelling study of how the medium of film came to shape our experience and thinking of the world and ourselves By locating the moving image in new ways of seeing and saying as manifest in the arts science and philosophy at the turn of the twentieth century the book redefines the cinema as one of the most important anthropological processes of modernity Moving beyond the typical understanding of cinema based on optical and linguistic models *Mapping the Moving Image* takes the notion of rhythm as its cue in conceptualizing the medium's morphogenetic potentialities to generate affectivity behaviour and logics of sense It provides a clear picture of how the forms of early film while mobilizing bodily gestures and demanding intimate affective

engagement from the viewer emerged in relation to bio political investments in the body The book also charts from a fresh perspective how the new gestural dynamics and visuality of the moving image fed into our thinking of time memory and the unconscious
