Arthur Lyons,2024-04-01 This new textbook has two main themes The first is Modern Methods of Construction MMC which is  
the off site manufacture of a wide spectrum of products ranging from whole buildings to be transported onto site down to  
smaller units or components for site integration The second theme describes the innovation and progress towards carbon  
zero by the major generators of CO2 in the construction industry namely cement steel and masonry The first section of the  
book describes and illustrates with photographs the major forms of Modern Methods of Construction These include fully  
completed 3D units panelised systems pods sub assemblies and on site MMC The section on Innovative Materials then  
describes a wide range of construction products which are entering into the built environment sector Some new entrants are  
variants on well established construction materials such as steel and concrete Materials such as these will remain major  
construction materials for the foreseeable future but their composition and manufacturing processes will inevitably have to  
change Timber also will remain a major construction material but sustainable sourcing is key and its utilisation as cross  
lamination timber CLT or as modified timber is rapidly developing As a result students and practitioners must familiarise  
themselves with these materials their composition and various uses The book goes on to describe variants of other traditional  
building products such as glass plastic and insulation which are undergoing major developments leading towards enhanced  
environmental sustainability as well as many emergent materials some of which are likely to be significant in future Modern  
Methods of Construction and Innovative Materials is the only book combining these important elements of the future of the  
industry in an easy to read guide for students and new practitioners It is essential reading for anyone studying and working  
in the built environment be they architects construction managers surveyors or engineers     *Public Documents of the State*
