This collection of essays explores contemporary manifestations of extraterritoriality and the diverse ways in which the concept has been put to use in various disciplines. Some of the essays were written especially for this volume; others are brought here together for the first time. The inquiry into extraterritoriality found in these essays is not confined to the established boundaries of political

conceptual and representational territories or fields of knowledge rather it is an invitation to navigate the margins of the legal juridical and the political but also the edges of forms of representation and poetics Within its accepted legal and political contexts the concept of extraterritoriality has traditionally been applied to people and to spaces In the first case extraterritorial arrangements could either exclude or exempt an individual or a group of people from the territorial jurisdiction in which they were physically located in the second such arrangements could exempt or exclude a space from the territorial jurisdiction by which it was surrounded The special status accorded to people and spaces had political economic and juridical implications ranging from immunity and various privileges to extreme disadvantages In both cases a person or a space physically included within a certain territory was removed from the usual system of laws and subjected to another In other words the extraterritorial person or space was held at what could be described as a legal distance In this respect the concept of extraterritoriality presupposes the existence of several competing or overlapping legal systems It is this notion of being held at a legal distance around which the concept of extraterritoriality may be understood as revolving
