The Samaritan's Dilemma Clark C. Gibson, Krister Andersson, The late Elinor Ostrom, Sujai Shivakumar, 2005-09-08 What s wrong with foreign aid Many policymakers aid practitioners and scholars have called into question its ability to increase economic growth alleviate poverty or promote social development At the macro level only tenuous links between development aid and improved living conditions have been found At the micro level only a few programs outlast donor support and even fewer appear to achieve lasting improvements The authors of this book argue that much of aid s failure is related to the institutions that structure its delivery These institutions govern the complex relationships between the main actors in the aid delivery system and often generate a series of perverse incentives that promote inefficient and unsustainable outcomes In their analysis the authors apply the theoretical insights of the new institutional economics to several settings First they investigate the institutions of Sida the Swedish aid agency to analyze how that aid agency s institutions can produce incentives inimical to desired outcomes contrary to the desires of its own staff Second the authors use cases from India a country with low aid dependence and Zambia a country with high aid dependence to explore how institutions on the ground in recipient countries also mediate the effectiveness of aid Throughout the book the authors offer suggestions about how to improve aid s effectiveness These suggestions include how to structure evaluations in order to improve outcomes how to employ agency staff to gain from their on the ground experience and how to engage stakeholders as owners in the design resource mobilization learning and evaluation processes of development assistance programs

The Samaritans, the Earliest Jewish Sect James Alan Montgomery, 1907 Israel's Past Bob Becking, 2021-10-04 How should one write a history of Ancient Israel In the last few decades a lively discussion has taken place on the historiography of ancient Israel Minimalists such as Philip Davies Thomas Thompson and Niels Peter Lemche challenged the usefulness of the Hebrew Bible as a source for constructing Israel s past Maximalists like Baruch Halpern and William Dever argued instead that the

data from the Hebrew Bible should be trusted until otherwise proven Others among whom we can name Hans Barstad Rainer Albertz and Lester Grabbe took a third road The essays in this volume follow that third road by applying insights from the field of philosophy of history A dozen case studies from David to the earliest Samaritans demonstrate how difficult it is to write a history of ancient Israel without falling in the abyss of an ideology in one direction or another The matrix designed by Manfred Weippert to look at the past through five windows landscape climate archaeology epigraphy and only at the end the Hebrew Bible turned out to be more helpful The conclusion of this research is that there are some stable pillars in the swamp of the past but it comes with the warning that the space between these pillars is large and cannot easily be filled
