World Meeting, 2001-12-31 Proceedings of the XIV World Meeting of the International Society for the Research on Aggression Prevention and Control of Aggression and the Impact on its Victims held in July 9 14 2000 in Valencia Spain Aggression is an aspect of human society that has interested scientists for many decades and their work has provided important knowledge about its causes and way to prevent and control this behavior However not only scientists but many professionals working in the wide spectrum of society from family to international policy are interested in having programs of interventions capable of reducing aggression and violence in our society This comprehensive book is a compendium of most research approaches that are currently taking place in the field of aggression focusing on the interventions to control and prevent this behavior and the impact on its victims The chapters of the book include biological approaches to aggression such as neuroanatomy neurochemistry neuroendocrinology genetics and psychopathology information about aggression in children and adolescents in different settings such as family school and

community characteristics of aggression in specific relationships such as marital and sexual and specific settings such as bars, prisons and traffic and cultural approaches to aggression, social prejudice, war and programs of peace. Furthermore, a small number of representative chapters about victims are included, ranging from the impact of aggression on behavior and physiology in animal models to victims of war. As this book highlights the interventions to prevent and control aggression, they have to be diverse, highly heterogeneous, in order to deal with all aspects of human beings and society, ranging from pharmacological control in individuals to programs of peace to promote respect among people and among nations. Scientists, academics and professionals dealing with any facet of aggression and its impact on our society will obtain in this book information about the complexity of this research field and the ways to approach our objective: eliminate aggression from the human behavioral repertoire.

Management of Aggressive Behavior Jane John-Nwankwo, MSN, Msn Jane John-Nwankwo Rn, 2015-05-31

Crisis Prevention and Intervention in Healthcare or simply put, Management of aggressive behavior is an effort to provide protection for the client and healthcare professional against any type of assault from either party. Assaultive behavior in the healthcare setting compromises the safety of the healthcare workers, the patients and visitors to the emergency rooms, mental health units, group homes, long term care facilities, etc. The abusive behavior undermines the efforts of the health care professionals that are in many cases the victims. Poor behavior management costs the hospital time, money and high turnover rates. This book discusses the meaning of assaultive behavior and crisis, the types and causes of crisis, General safety measures, Personal safety measures, The assault cycle, Aggression and violence, predicting factors, Obtaining patient history from a patient with violent behavior, Characteristics of aggressive and violent patients and victims, Verbal and physical maneuvers to diffuse and avoid violent behavior, Strategies to avoid physical harm, Restraining techniques, Appropriate use of medications as chemical restraints and lastly, emergency preparedness for hospitals. Each of the seven chapters has assessment questions to ensure proper understanding of the topics taught. This is an ideal textbook to teach healthcare professionals about Crisis Prevention, Intervention in Healthcare as well as management of assaultive behavior in the healthcare setting.

Causes and Management of Psychiatric Patients' Aggression & Violence Eman El-Genady, Zeinab Abd- Halim, Enayatee Abd- El Wahab, 2014-07-07

Aggression and violence are significant clinical problems in psychiatric settings, however, researches exploring violent behavior are limited and neglected area of investigation. Violent and aggressive behavior by psychiatric patients poses a major challenge to psychiatric staff and health planners because of the risks to the individuals involved in violent incidents and the implications of those risks for the organization of services. Management of violence and aggression is subdivided according to short term therapy, acute emergency patients in which a rapid intervention is used to control the acute stages of violence which often constitute a medical emergency.
