Search And Screening General Principles With Historical Applications:

Search and Screening Bernard Osgood Koopman, 1999 Probabilistic Search for Tracking Targets Irad Ben-Gal, Eugene Kagan, 2013-03-25 Presents a probabilistic and information theoretic framework for a search for static or moving targets in discrete time and space Probabilistic Search for Tracking Targets uses an information theoretic scheme to present a unified approach for known search methods to allow the development of new algorithms of search The book addresses search methods under different constraints and assumptions such as search uncertainty under incomplete information probabilistic search scheme observation errors group testing search games distribution of search efforts single and multiple targets and search agents as well as online or offline search schemes The proposed approach is associated with path planning techniques optimal search algorithms Markov decision models decision trees stochastic local search artificial intelligence and heuristic information seeking methods Furthermore this book presents novel methods of search for static and moving targets along with practical algorithms of partitioning and search and screening Probabilistic Search for Tracking Targets includes complete material for undergraduate and graduate courses in modern applications of probabilistic search decision making and group testing and provides several directions for further research in the search theory The authors Provide a generalized information theoretic approach to the problem of real time search for both static and moving targets over a discrete space Present a theoretical framework which covers known information theoretic algorithms of search and forms a basis for development and analysis of different algorithms of search over probabilistic space Use numerous examples of group testing search and path planning algorithms to illustrate direct implementation in the form of running routines Consider a relation of the suggested approach with known search theories and methods such as search and screening theory search games Markov decision process models of search data mining methods coding theory and decision trees Discuss relevant search applications such as quality control search for nonconforming units in a batch or a military search for a hidden target Provide an accompanying website featuring the algorithms discussed throughout the book along with practical implementations procedures *Tactics of Naval Combat Arms* Milan Vego, 2025-11-04 This new volume from the Blue and Gold Professional Library describes and analyzes the tactical employment of naval combat arms including surface forces submarine forces naval aviation and naval special forces in a high intensity conventional war at sea *Tactics of Naval Combat Arms* is framed by combat missions of each naval combat arm and explained as part of the much broader operational framework of obtaining or denying sea control Tactical techniques and applications are explained in accessible terms including coverage of naval special forces and respective unmanned vehicles The book contains extensive resources covering the scouting methods used by surface combatants attack submarines and naval combat ASW aircraft avoidance maneuvering by submarines and use of weapons by naval aircraft Written as a sequel to Milan Vego's *General Naval Tactics* this new work offers essential insight for naval tacticians and strategists An Annotated Timeline of Operations Research
