

Given:
 10,800' runway
 – 200' line up
 30° flaps

Find:
 CFL correction

WARNING

ALWAYS CHECK CRITICAL FIELD LENGTHS, WINDS, TEMPERATURE, PRESSURE ALTITUDE AND FLAPS.

REMARKS:

- 1 Use Set of Runway Condition Reading, Runway, use ROPMAI (OPRMAI), use R_{FL} .
- 2 Refer to correction factors for actual field length correction due to increased aircraft speed with flaps.
- 3 Benefits of bankrolls are normally assumed as an increased margin of safety and not considered for a bankroll penalty.
- 4 Data included in T.O. 15-12000a (30-1).

EXAMPLE 1: CRITICAL FIELD LENGTH

EXAMPLE 2: AIRFLOW CROSS SECTION

DATA:
 Runway condition = 400 ft
 Air conditioning off
 Engines switching off
 SAT Altitude = 0 ft sea
 RCL = 30
 Wind = 0 knot headwind
 Grade = 0% headwind
 Flaps = 30°
 SAT = 32°F

Fracture Mechanics of Piezoelectric Solids with Interface Cracks Volodymyr Govorukha, Marc Kamlah, Volodymyr Loboda, Yuri Lapusta, 2017-03-14 This book provides a comprehensive study of cracks situated at the interface of two piezoelectric materials It discusses different electric boundary conditions along the crack faces in particular the cases of electrically permeable impermeable partially permeable and conducting cracks The book also elaborates on a new technique for the determination of electromechanical fields at the tips of interface cracks in finite sized piezoceramic bodies of arbitrary shape under different load types It solves scientific problems of solid mechanics in connection with the investigation of electromechanical fields in piezoceramic bodies with interface cracks and develops calculation models and solution methods for plane fracture mechanical problems for piecewise homogeneous piezoceramic bodies with cracks at the interfaces It discusses the open crack model which leads to a physically unrealistic oscillating singularity at the crack tips and the contact zone model for in plane straight interface cracks between two dissimilar piezoelectric materials It also investigates the model of a crack with electro mechanical pre fracture zones The formulated problems are reduced to problems of linear relationship which correspond to different crack models and their exact analytical solutions are found The book presents in detail the expressions for stress and electric displacement intensity factors as well as for the energy release rate The influence of the electric permittivity of the crack the mechanical load and the electric field upon the electro elastic state as well as the main fracture mechanical parameters are analyzed and clearly illustrated This book addresses postgraduate students university teachers and researchers dealing with the problems of fracture mechanics of piezoelectric materials as well as engineers who are active in the analysis of strength and durability of piezoelectric constructions [Ain't Nobody's Fool](#) Martha Ackmann, 2025-12-30 A larger than life new biography of country music legend and philanthropist Dolly Parton In *Ain't Nobody's Fool* The Life and Times of Dolly Parton Martha Ackmann chronicles the life of an American Original From her impoverished childhood in the Smoky Mountains to international stardom as a singer songwriter actress businesswoman and philanthropist Dolly Parton has exceeded everyone's expectations except her own During a time when the Beatles set the standard for contemporary music Dolly appeared on a local country music television show that her high school classmates thought was pure cornpone The day after her high school graduation she boarded a bus for Nashville but record executives turned her down One said her voice sounded like a screech owl When Dolly finally got her foot in the door her talent and focus catapulted her to the top of country charts the pop world and movie stardom Yet her success came at a price Shunned by many in Nashville who saw her ambition as a betrayal of her country music roots Dolly became the target of death threats lawsuits and a judge who threatened to throw her in jail She nearly collapsed on stage and later succumbed to depression that pushed her to the brink but she refused to be counted out and came back stronger than ever developing Dollywood the amusement park that became the economic engine of East Tennessee and founding the Imagination Library that provides

free books to children around the world Her philanthropy to health organizations led to creation of the Moderna COVID vaccine And finally she returned to her roots recording bluegrass albums that became the most celebrated of her unparalleled 60 year career Ain t Nobody s Fool is a deep dive into the social historical and personal forces that made Dolly Parton one of the most beloved and unifying figures in public life and includes interviews with friends family members school mates Nashville neighbors members of her band studio musicians producers and many others It also features never before seen photographs and unearthed documents shedding light on her family s hardscrabble life More than anything Martha Ackmann s fresh and animated new book proves Dolly Parton knows just who she is and she ain t nobody s fool

Quantum Chromodynamics B. L. Ioffe, V. S. Fadin, L. N. Lipatov, 2010-01-21 Aimed at graduate students and researchers in theoretical physics this book presents the modern theory of strong interaction quantum chromodynamics QCD The book exposes various perturbative and nonperturbative approaches to the theory including chiral effective theory the problems of anomalies vacuum tunnel transitions and the problem of divergence of the perturbative series The QCD sum rules approach is exposed in detail A great variety of hadronic properties masses of mesons and baryons magnetic moments form factors quark distributions in hadrons etc have been found using this method The evolution of hadronic structure functions is presented in detail together with polarization phenomena The problem of jets in QCD is treated through theoretical description and experimental observation The connection with Regge theory is emphasized The book covers many aspects of theory which are not discussed in other books such as CET QCD sum rules and BFKL

Nuclear, Particle and Many Body Physics Philip M. Morse, Bernard T. Feld, Herman Feshbach, 2013-10-22 Nuclear Particle and Many Body Physics Volume II is the second of two volumes dedicated to the memory of physicist Amos de Shalit The contributions in this volume are a testament to the respect he earned as a physicist and of the warm and rich affection he commanded as a personal friend The book contains 41 chapters and begins with a study on the renormalization of rational Lagrangians Separate chapters cover the scattering of high energy protons by light nuclei approximation of the dynamics of proton neutron systems the scattering amplitude for the Gaussian potential Coulomb excitation of decaying states the and optical potential for pions propagating in nuclear matter Subsequent chapters deal with topics such as the elastic scattering of protons from analog resonances internal Compton scattering in a muonic atom with an excited nucleus and a formal theory of finite nuclear systems The book also includes a eulogy and recollections of Amos de Shalit

Quark-gluon Plasma 6 Xin-nian Wang, 2025-02-27 This book the sixth volume in a series on Quark Gluon Plasma QGP research offers updated reviews on theoretical developments and phenomenological understanding of the hot and dense matter formed in high energy heavy ion collisions Authored by leading experts in the field it delves into how these advancements help shed light on the recent data emerging from the experiments conducted at the Relativistic Heavy Ion Collider RHIC and the Large Hadron Collider LHC Despite setbacks caused by the COVID 19 pandemic the book explores a multitude of recent progresses including insights into jet measurements study of

hydrodynamization in QGP flow measurements in large and small systems spin polarization and chiral magnetic effect in relativistic heavy ion collisions Additionally the book features a timely review of the QCD phase diagram in light of the new data collected at the Beam Energy Scan program at RHIC Furthermore it includes a chapter on the growing role of machine learning in analyzing and interpreting complex data Written carefully with detailed analyses and expert reviews Quark Gluon Plasma 6 stands as an invaluable reference for individuals engaged in the field Luzerne Legal Register Reports George Brubaker Kulp, Joseph D. Journal of the British Dairy Farmers' Association British Dairy Farmers' Association, 1885 Topological GeometroDynamics Matti Pitkanen, 2006-05 Topological GeometroDynamics is a modification of general relativity inspired by the conceptual problems related to the definitions of inertial and gravitational energy in general relativity Topological geometrodynamics can be also seen as a generalization of super string models Physical space times are seen as four dimensional surfaces in certain eight dimensional space The choice of this space is fixed by symmetries of the standard model so that geometrization of known classical fields and elementary particle quantum numbers results The notion of many sheeted space time allows re interpretation of the structures of perceived world in terms of macroscopic space time topology The generalization of the number concept based on fusion of real numbers and p adic number fields implies a further generalization of the space time concept allowing to identify space time correlates of cognition and intentionality Quantum

measurement theory extended to a quantum theory of consciousness becomes an organic part of theory A highly non trivial prediction is the existence of a fractal hierarchy of copies of standard model physics with dark matter identified in terms of macroscopic quantum phases characterized by dynamical and quantized Planck constant The book is a comprehensive overview and analysis of topological geometrodynamics as a mathematical and physical theory
