Late Prehistory of Point Pelee, Ontario and Environs David L. Keenlyside, 1978-01-01 Research at Point Pelee in extreme southern Ontario revealed a unique sequence of prehistoric occupation at three major multi component sites This sequence has been divided into four periods commencing in the 6th century A D and terminating about the fifteenth century A D Published in English

Birding at Point Pelee Henrietta O'Neill, 2006-10-03 A birder s history of one of Canada s most famous birding spots Birding at Point Pelee traces Point Pelee s story from the 1870s to the national park s establishment in 1918 to present day when as many as 50 000 birders visit the park in May during spring migration The book portrays the backdrop against which the park was evolving the scientific discoveries and changes in ornithological methods through the decades early specimen collecting bird banding the development of binoculars and telescopes the growth of nature photography the shift from birding as science to birding as hobby as well as philosophical shifts and debates about amateur versus professional credentials and the balance to strike between conservation and recreation Thoroughly researched and lively the story takes readers from the earliest days when the birders were few but fervent to today s international tourism phenomenon

Point Pelee Darryl Stewart, Don Ross, 1977

The Reluctant Twitcher Richard Pope, 2009-09-07 The human side of birding comes to the fore in *The Reluctant Twitcher* a serious yet humorous account of birds and birding and the art of chasing rarities Richard Pope a lifelong birder had successfully avoided this latter pursuit for many years but capitulated in 2007 when he embarked on his Big Year the object being to record at least three hundred birds in Ontario within that calendar period Almost instantly a relatively normal birdwatcher morphed into a twitcher albeit reluctantly pursuing rare species of birds from Rainy River to the Ottawa and well beyond his wildest expectations Though it was a challenge that was not without trials and disappointments Pope describes all his adventures with self deprecating humour Not just another book on birding Pope s unique approach is supported by an array of exceptional colour photographs

Applications in Coastal Modeling A.S. Trenhaile, V.C. Lakhan, 1989-06-01 The importance of models to facilitate our understanding and management of the coastal system is evident from this book which shows that the preference for using models to study the coastal system is shared not only by different research institutions government military industry and academia but also by researchers from diverse backgrounds

With contributions from several leading experts a variety of models physical analytical numerical and computer simulation are presented on various components of the coastal system The book opens by examining the coast as a system and provides an overview of models systems concepts and the systems approach It next covers the simulation design process stressing that modeling and simulation should form an interface between real world processes and the field of General Systems Theory It is clearly shown that a system can be investigated with more than one type of model For example it is shown that waves can be studied with physical models empirical and numerical models or with computer simulation models Likewise beaches can be investigated with physical numerical or empirically based models The indispensability of models to enhance our understanding of coastal dynamics and associated component systems is emphasised Mathematical modeling of rock coast development and the simulation of deltaic depositional systems are covered A chapter on analytical modeling of predator prey interactions highlights the fact that the coastal system also has biotic resources Finally problems which have to be overcome for the practical application of numerical and simulation models are discussed The explanatory and detailed formulation of the various models together with more than 100 figures make this book worthwhile reading for senior undergraduates graduate students and all coastal researchers interested in the formulation and application of models of the coastal system

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
