   Networks of Learning Automata M.A.L. Thathachar,P.S. Sastry,2011-06-27 Networks of Learning Automata Techniques for Online Stochastic Optimization is a comprehensive account of learning automata models with emphasis on multiautomata systems It considers synthesis of complex learning structures from simple building blocks and uses stochastic algorithms for refining probabilities of selecting actions Mathematical analysis of the behavior of games and feedforward networks is provided Algorithms considered here can be used for online optimization of systems based on noisy measurements of performance index Also algorithms that assure convergence to the global optimum are presented Parallel operation of automata systems for improving speed of convergence is described The authors also include extensive discussion of how learning automata solutions can be constructed in a variety of applications   **Learning Automata Approach for Social Networks** Alireza Rezvanian,Behnaz Moradabadi,Mina Ghavipour,Mohammad Mehdi Daliri Khomami,Mohammad Reza Meybodi,2019-01-22 This book begins by briefly explaining learning automata LA models and a recently developed cellular learning automaton CLA named wavefront CLA Analyzing social networks is increasingly important so as to identify behavioral patterns in interactions among individuals and in the networks evolution and to develop the algorithms required for meaningful analysis As an emerging artificial intelligence research area learning automata LA has already had a significant impact in many areas of social networks Here the research areas related to learning and social networks are addressed from bibliometric and network analysis perspectives In turn the second part of the book highlights a range of LA based applications addressing social network problems from network sampling community detection link prediction and trust management to recommender systems and finally influence maximization Given its scope the book offers a valuable guide for all researchers whose work involves reinforcement learning social networks and or artificial intelligence   Homogeneous Networks of Learning Automata Polska Akademia Nauk. Learning Automata K. Najim,A.S. Poznyak,2014-06-28 Learning systems have made a significant impact on all areas of engineering problems They are attractive methods for solving many problems which are too complex highly non linear

uncertain incomplete or non stationary and have subtle and interactive exchanges with the environment where they operate The main aim of the book is to give a systematic treatment of learning automata and to produce a guide to a wide variety of ideas and methods that can be used in learning systems including enough theoretical material to enable the user of the relevant techniques and concepts to understand why and how they can be used The book also contains the materials that are necessary for the understanding and development of learning automata for different purposes such as processes identification optimization and control Learning Automata Theory and Applications may be recommended as a reference for courses on learning automata modelling control and optimization The presentation is intended both for graduate students in control theory and statistics and for practising control engineers **Intelligent Random Walk: An Approach Based on Learning Automata** Ali Mohammad Saghiri,M. Daliri Khomami,Mohammad Reza Meybodi,2019-01-02 This book examines the intelligent random walk algorithms based on learning automata these versions of random walk algorithms gradually obtain required information from the nature of the application to improve their efficiency The book also describes the corresponding applications of this type of random walk algorithm particularly as an efficient prediction model for large scale networks such as peer to peer and social networks The book opens new horizons for designing prediction models and problem solving methods based on intelligent random walk algorithms which are used for modeling and simulation in various types of networks including computer social and biological networks and which may be employed a wide range of real world applications Study of Neurotron Networks in Learning Automata. automata scheme to existing routing techniques These experiments which are performed on sophisticated simulation packages produced for this study take as examples hierarchical and general structured telephone networks and packet switched communications networks configured with both virtual call and datagram protocols In addition studies under failure mode conditions including link node and focussed overloads conclusively demonstrate the superior performance afforded by the learning automata routing approach   Adaptive Control of Communication Networks Using Learning Automata M.
