New Anthropomorphism:

The New Anthropomorphism John S. Kennedy, 1992-07-16 In this 1992 book John Kennedy's point is that explicit anthropomorphism was well nigh killed by fierce criticism from the radical Behaviourists but that we have to recognize that today there is a new anthropomorphism which is much harder to avoid because it is unintended and largely unconscious For that reason even those who if they were asked would firmly reject anthropomorphism nevertheless unwittingly slip into it from time to time This book contains nineteen essays on behavioural concepts which have seldom been identified as anthropomorphic but in fact bear that connotation and lead to mistakes Some of these such as search images in birds and the learning of grammatical language by apes have been seen through as errors after a time A greater number such as efference copy goal directedness cognition and suffering in animals are still current though not yet regarded as erroneous The final chapter outlines things we can do to minimise the damage it does to the causal analysis of animal behaviour

The New Anthropomorphism John S. Kennedy, 1992-07-16 John Kennedy's thesis is that anthropomorphism is not necessarily dead but is lurking under different disguises In fact it still affects research but is often unintended and therefore it goes unrecognized He provides ample documentary evidence of the way researchers unconsciously slip into anthropomorphism The book contains nineteen essays on behavioral concepts that have seldom been identified as anthropomorphic but in fact bear that connotation and lead to mistakes Some of these such as search images in birds and the learning of grammatical language by apes have been seen as errors after a time A greater number such as efference copy goal directedness cognition and suffering in animals are still current though not yet regarded as erroneous We can hardly hope to cure ourselves altogether of thinking anthropomorphically and it can be very useful as a metaphor The final chapter outlines things we can do to minimize the damage anthropomorphism does to the casual analysis of animal behavior

Fugitive Poses Gerald Robert Vizenor, 2000-01-01 Native sovereignty Gerald Vizenor contends is not possessed but expressed It emerges not from practicing vengeful and exclusionary policies and politics or by simple recourse to territoriality but by turning to Native transmotion the forces and processes of creativity and imagination lying at the heart of Native world views and actions Overturning long held scholarly and popular assumptions Vizenor offers a vigorous examination of tragic cultures and victimry

Thinking with Animals Lorraine Daston, Gregg Mitman, 2005-02-02 Is anthropomorphism a scientific sin Scientists and animal researchers routinely warn against animal stories and contrast rigorous explanations and observation to facile and even fanciful projections about animals Yet many of us scientists and researchers included continue to see animals as humans and humans as animals As this innovative new collection demonstrates humans use animals to transcend the confines of self and species they also enlist them to symbolize dramatize and illuminate aspects of humans experience and fantasy Humans merge with animals in stories films philosophical speculations and scientific treatises In their performance with humans on many stages and in different ways animals move us to think From Victorian vivisectionists to

elephant conservation from ancient Indian mythology to pet ownership in the contemporary United States our understanding of both animals and what it means to be human has been shaped by anthropomorphic thinking The contributors to *Thinking with Animals* explore the how and why of anthropomorphism drawing attention to its rich and varied uses Prominent scholars in the fields of anthropology ethology history and philosophy as well as filmmakers and photographers take a closer look at how deeply and broadly ways of imagining animals have transformed humans and animals alike Essays in the book investigate the changing patterns of anthropomorphism across different time periods and settings as well as their transformative effects both figuratively and literally upon animals humans and their interactions Examining how anthropomorphic thinking works in a range of different contexts contributors reveal the ways in which anthropomorphism turns out to be remarkably useful it can promote good health and spirits enlist support in political causes sell products across boundaries of culture of and nationality crystallize and strengthen social values and hold up a philosophical mirror to the human predicament

Dominion Matthew Scully, 2002-10-15 Argues for responsible action in the treatment of animals challenging popular conceptions about animal feeling and awareness and profiling a safari convention factory farm and the works of top writers

The Cognitive Animal Marc Bekoff, Colin Allen, Gordon M. Burghardt, 2002-06-21 The fifty seven original essays in this book provide a comprehensive overview of the interdisciplinary field of animal cognition The contributors include cognitive ethologists behavioral ecologists experimental and developmental psychologists behaviorists philosophers neuroscientists computer scientists and modelers field biologists and others The diversity of approaches is both philosophical and methodological with contributors demonstrating various degrees of acceptance or disdain for such terms as consciousness and varying degrees of concern for laboratory experimentation versus naturalistic research In addition to primates particularly the nonhuman great apes the animals discussed include antelopes bees dogs dolphins earthworms fish hyenas parrots prairie dogs rats ravens sea lions snakes spiders and squirrels The topics include but are not limited to definitions of cognition the role of anecdotes in the study of animal cognition anthropomorphism attention perception learning memory thinking consciousness intentionality communication planning play aggression dominance predation recognition assessment of self and others social knowledge empathy conflict resolution reproduction parent young interactions and caregiving ecology evolution kin selection and neuroethology
