Maternal Memories:

An Arts Therapeutic Approach to Maternal Holding Ariel Moy, 2021-08-08 Little research has explored the everyday simple and long term experience of maternal holding particularly after the first year of a child's life. The research that has been undertaken commonly examines holding through the lens of attachment with a focus on the impact of holding upon the child. Employing an arts based collaborative inquiry approach participants' stories of holding as well as the author's own convey the significant maternal experiences of holding their children over individual arts therapeutic sessions. Optimal moments of holding included strange powerful and meaningful experiences of expansion into self in relationship. Attention is drawn to the ways in which holding can alert us to the current state of mother-child relationships, how we understand story and structure those relationships and the ways in which we can attend to holding in order to develop deeply satisfying experiences of a mother-child unit. *An Arts Therapeutic Approach to Maternal Holding* aims to draw attention to the intersubjective qualities of the mother-child relationship, explore why holding matters and offer suggestions for therapeutic practice. This book is essential reading for therapeutic practitioners and those in allied health fields who work with mothers and children.

South Slavic Women's Transgenerational Trauma Healing Through Oral Memory Practices Danica Anderson, 2023-10-30 *South Slavic Women's Transgenerational Trauma Healing through Oral Memory Practices* Women, War Crimes and War Survivors explains that Kolo Informed Trauma Treatment is a clinical, cultural, psychological and neurobiological approach that draws upon the rich scientific UNESCO intangible cultural heritage and embodied practices of the South Slavic Kolo circle movement format or somatic folk dance. The author argues that Slavic oral memory practices are not in fact worthless or outdated in healing trauma. The inclusion of the little known or rarely researched women who have experienced war crimes and war trauma demonstrates the intrinsic depth and female indigenous resources aligning with many scientific interdisciplinary fields and women's human rights. Central to the Kolo Informed Trauma Treatment is the profound recognition of the importance of women's cultural memory and somatic oral traditions to evolve towards communal healing. Women's memory narrative enables the South Slavic people to have profound communal approaches to offer insights into the effects of war trauma, advocating paths towards thriving. Through a recalibration with the relationship of women as valued resources and prominence as creators of healing cultures, South Slavic women's communal healing practices if orchestrated on a planetary scale elaborate inclusive dynamic homeostasis.

Memory and Nation-Building Vandana Saxena, 2021-08-31 Nations are built by narrating their past. Threads of common memories weave the fabric of the national culture, integrating the heterogeneous communities into the idea of a single nation. In multicultural societies the process is a
